GLOSSARY

Autonomous District Council:

Under the provisions of the Sixth Schedule of the Constitution of India, Autonomous District Councils have been constituted in Scheduled Tribe dominated districts of Assam, Meghalaya, Mizoram, and Tripura in the North East to administer and make laws, rules, and regulations for the development of tribal communities.

Gram Panchayat:

A Gram Panchayat (GP) is a local self-government institution at the village level under the Panchayati Raj system. Its members are elected directly by the people. The head of the GP is known as the Sarpanch or Pradhan.

Scheduled Tribe:

Scheduled Tribes are indigenous communities considered among the earliest inhabitants of the Indian subcontinent, often referred to as Adivasis. The term “Scheduled Tribes” was first introduced in the Constitution of India. Article 366(25) defines them as “such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are deemed under Article 342 to be Scheduled Tribes for this Constitution.” Article 342 prescribes the procedure for such specification.

Particularly Vulnerable Tribal Group (PVTG):

A sub-classification of Scheduled Tribes considered more vulnerable than others. A group is identified as a PVTG based on the following criteria: (i) pre-agricultural level of technology, (ii) low level of literacy, (iii) economic backwardness, and (iv) a declining or stagnant population. There are 75 such groups identified in India.

Physical Displacement:

Relocation, loss of residential land, or loss of shelter due to (i) involuntary land acquisition, or (ii) involuntary restrictions on land use or access to legally designated parks and protected areas.

Economic Displacement:

Loss of land, assets, access to assets, income sources, or means of livelihood due to (i) involuntary land acquisition, or (ii) involuntary restrictions on land use or access to legally designated parks and protected areas.

Vulnerable Groups:

Include people below the poverty line, the landless, the elderly, women and children, Indigenous Peoples, and those without legal title to land.

EXECUTIVE SUMMARY

1. The Government of Assam has requested the Asian Development Bank (ADB) to finance the Sustainable Wetland and Integrated Fisheries Transformation Project (SWIFT) to support Assam Vision 2030, focusing on sustainable fisheries development and improving the livelihoods of small-scale food producers. The project is estimated to cost \$76.0 million. The Indigenous Peoples Plan (IPP) has been prepared based on the detailed design report by the Directorate of Fishery (DoF), Government of Assam. The IPP complies with applicable State Government, Govt. of India, and ADB Safeguard Policy Statement (SPS), 2009. The project is classified as Category B for Indigenous Peoples under ADB SPS, 2009
2. The proposed Sustainable Wetland and Integrated Fisheries Transformation Project (SWIFT) aims to support the Government of Assam in promoting sustainable, fishery-based livelihood improvement for communities in floodplain wetlands, locally known as beels.

The project will address: (i) strong institutional frameworks and governance structures with clear rules, roles, and responsibilities; (ii) provision of economic incentives and livelihood diversification to strengthen community commitment to conservation; (iii) adaptive management in response to changing conditions and community feedback, with flexibility to adjust practices based on monitoring results; (iv) integration of traditional knowledge with modern techniques to improve resource management; and (v) early and continuous engagement of local communities in decision-making to promote ownership and active participation. The primary beneficiaries will be fisher communities and beel users through increased productivity and community-based sustainable beel management.

3. The project would not cause any adverse impacts on the Scheduled Tribe (ST) population but benefit them positively by strengthening community based beel management, increasing in fish production and providing them a sustainable beel-based livelihood system.
4. At the subproject level, the social assessment identified the presence of Scheduled Tribe (ST) households in villages surrounding most beels. These communities are project beneficiaries, as they traditionally depend on beels for fishing for consumption and income.

Assam has an ST population of 12.4%. Six districts—Karbi Anglong, Dima Hasao, Kokrajhar, Chirang, Baksa, and Udalguri—are designated as Scheduled Areas under Articles 244(2) and 275(1) of the Constitution of India.

Of the 74 priority subprojects surveyed, around 45 beels showed substantial ST presence (more than 20%), covering more than 8000 households from ethnic groups such as Garo, Bodo, Rabha, Tiwa, Mising, Thengal Kachari, and Sonowal Kachari. Other sites proposed for subsequent phases are also expected to have significant ST populations. These sites are yet to be identified by the Department of Fishery (DoF); the Indigenous Peoples Plan (IPP) will be updated once they are finalized.

5. Public consultations were conducted at 74 locations attended by over 2700 persons including ST people (1700 men and 1052 women) in the project to ensure peoples' participation during the project preparatory stage. The men and women were consulted in all 74 separate consultation meetings. Aiming at promotion of public understanding and fruitful solutions of developmental problems such as local needs, stakeholders were consulted through focus group discussions, and individual interviews.
6. This Indigenous Peoples Plan (IPP) has been prepared based on the project social assessment (PSA), due diligence, meaningful consultations with Scheduled Tribes (STs), and a review of

applicable legal and policy frameworks of the Government of India, the State Government, and Asian Development Bank policy requirements.

Output 2 of the project focuses on enhancing community livelihoods through initiatives linked to beel restoration and management. Key components include: (i) capacity building of Beel Development Committees (BDCs) and their inclusion in the fisheries value chain; (ii) public sector support for community-based fisheries value chain infrastructure; (iii) private sector and entrepreneur-led fisheries commercialization; and (iv) other income-generating activities.

These measures ensure that Indigenous Peoples receive culturally appropriate, gender-responsive social and economic benefits.

7. The Social Safeguard and Gender Specialists of the PIU, supported by Social Safeguard and Gender Coordinators of CPIUs and community animators, will conduct need-based assessments of beneficiaries to finalize activities for inclusion in business and livelihood plans. The Indigenous Peoples Plan (IPP) will be updated once the final list of beneficiaries and activities is confirmed.

The subproject (beel) budget for IPP implementation is ~Rs.2.20 lakh, to be borne by the project. Scheduled Tribe (ST) households in non-priority locations, yet to be identified, will be prioritized under the project's livelihood component.

The implementing agency for business and livelihood plans will ensure that ST households are prioritized, consulted, and participate based on their willingness. Non-priority locations will be assessed using the Indigenous Peoples impact screening checklist, followed by due diligence by the Implementing Agency/Directorate of Fishery/ Executing Agency/ (IA/DoF/EA).

8. A three-tier, project-specific grievance redress mechanism (GRM) will be established to receive, evaluate, and resolve social and environmental safeguard-related concerns of affected persons at the project level.

The Social Safeguard Specialist of the PIU will be responsible for implementing the Indigenous Peoples Plan (IPP), with support from Social Safeguard and Gender Coordinators of CPIUs, and will report to the Asian Development Bank (ADB) through semi-annual social safeguards monitoring reports.

Monitoring and supervision will be conducted on an ongoing basis until issuance of the project completion report.

I. PROJECT DESCRIPTION

A. Background

1. The Government of Assam has requested the Asian Development Bank to support the Sustainable Wetland and Integrated Fisheries Transformation (SWIFT) Project. The proposed project will support the Government of Assam in promoting sustainable fishery-based livelihood improvement for communities in floodplain wetlands, locally known as *beels*. The project is aligned with Assam Vision 2030, with a focus on sustainable development of the fisheries sector and enhancing the livelihoods of small-scale food producers.¹
2. Assam is the largest state in India's North-Eastern region with an estimated population of 31.2 million.² While its Gross Domestic Product (GDP) per capita grew by 5.3% in FY 2020, it remains 35% lower than the national average. Assam also lags in poverty reduction, with 32% of its population remaining multidimensionally poor and living below the national poverty line.³ Eighty-six (86%) of the state population live in rural areas, and mostly dependent on the agricultural sector including the allied fisheries sector as 70% of the rural population are employed by the sector. In Assam, agriculture is a key pillar of the economy, contributing 30% to the gross state domestic product (US\$ 57 billion, 2022).⁴
3. Assam is endowed with rich aquatic ecosystems in the form of floodplain wetlands (hereafter referred to as *beels*), swamps, ponds, and rivers. The *beels*, extending over more than one lakh hectare, constitute the most crucial fishery resource of the state. They are used for multiple purposes and involve diverse user systems.

In terms of the fisheries sector, Assam is the fourth-largest inland fish-producing state in India, with production of 443,000 MT in 2022–2023. Fish farming serves as a key livelihood source in rural areas, with more than 2.5 million people engaged in the sector. It also contributes significantly to the nutritional security of the population. Fish is a staple food and a major source of protein, with more than 90% of Assam's population being fish consumers.

The State currently exports around 20,000 metric ton of fish annually to meet per capita requirements⁵. Fish production in Assam comes mainly from aquaculture (ponds and tanks) and capture fisheries in *beels*. Fish supply in Assam comes primarily from two sources: aquaculture (fish farming in ponds and tanks) and beel fisheries (capture fisheries from floodplain wetlands).

4. Beel fisheries have, or have had, a direct connection to river channels, covering an area of nearly 72,000 ha. In general, Assam's *beels* are characterized by seasonal inundation from rivers or catchment areas during the rainy season. They function as natural water storage or reservoir systems, supporting flood control.

The *beels* are a primary source of fish germplasm and provide excellent conditions for spawning and breeding. These wetlands contribute up to 11% of the state's fish production

5. However, Assam beel habitat is reported to be degrading over the period due to decreasing connectivity with adjacent rivers, and human-induced pollution factors. Extensive embankments for flood control, heavy silt loads from the Brahmaputra River, deforestation, and intensive agricultural practices have damaged this connectivity through siltation. This has led to the isolation of *beels* from seasonal floods and restricted the entry of riverine fish stocks. Floating weeds, such as water hyacinth, further reduce plankton abundance, resulting in poor fisheries

²Census of India. 2021.

³NITI Aayog. 2021. India: National Multidimensional Poverty Index Baseline Report. Delhi.

⁴Government of Assam. State Income Statistics, 2022. Guwahati.

⁵ It is estimated that fish requirement is 15 kg per capita, per annum.

productivity. Overfishing, prevalence of exotic and invasive fish species, poor community participation in management of beels and fisheries value chain are some other factors observed to be found responsible for degradation of beel ecosystem.⁶

6. The proposed project will address the importance of - (i) strong institutional frameworks and governance structures, establishing clear rules, roles, and responsibilities; (ii) provision of economic incentives and livelihood diversification to enhance the commitment of communities to conservation efforts; (iii) adaptive management to changing conditions and feedback from the community and being flexible to adjust the project's practices based on monitoring results; (iv) combination of traditional knowledge and latest techniques to enhance resource management practices; and (v) the engagement of local communities in decision-making processes from the outset, enabling strong community ownership and active participation. The primary beneficiaries for the project will be the fisher communities/ beel users with increased productivity and community based sustainable beel management.
7. The project is not expected to cause any adverse impacts on the Scheduled Tribe (ST) population; rather, it will provide positive benefits by strengthening community-based beel management, increasing fish production, and promoting sustainable beel-based livelihoods. The project is categorized as "B" for Indigenous Peoples (IP). This draft Indigenous Peoples Plan (IPP) has been prepared for the SWIFT in accordance with the requirements of the Asian Development Bank Safeguard Policy Statement (SPS, 2009), based on the poverty and social assessment conducted during project preparation, including due diligence and stakeholder consultations
8. The Executing Agency (EA) of the project will be Assam Rural Infrastructure and Agricultural Services (ARIAS) Society, headed by the State Project Director, under which a dedicated SWIFT Project Management Unit (PMU) has been established to lead, manage, and coordinate project activities. The Department of Fishery (DoF), Assam Government will be the implementing agency. The Social Safeguard Specialist and Gender Specialist of PIU will assist SPD in implementation of safeguard measures under the guidance of PIU.

B. Project Description

1. The Project includes strengthening of institutional capacity and regulatory framework, community-based fishery and diversification of income and restoration of 102 beels across the state. The purpose is to enhance beel fishery productivity and community-based sustainable wetland management in the state of Assam. The project will have following three outputs:
2. **Output 1: Institutional capacity and regulatory framework for sustainable beel ecosystem and fisheries management strengthened.** The output aims to reform the existing government system for beel management, particularly the leasing system. It will support the following activities:
 - (i) Updating relevant beel management and fisheries acts, regulations, and rules to enable community-based management, along with preparation of public awareness materials;
 - (ii) Preparing rules and guidelines for a community-based beel management system, considering variations in wetland hydrology, channel connectivity, and agroecological conditions, and providing training on these aspects;
 - (iii) Developing a sustainable operational model as part of the project exit strategy;
 - (iv) Capacity building and training of Department of Fisheries (DoF) staff and other allied public institutions, including the State Wetland Authority, on modern fisheries stocking and conservation techniques, community-based beel management best practices, and the use of digital technologies;

⁶Sector assessment: agriculture, food, nature, and rural development sector (fisheries) ADB

- (v) Supporting research and development in beel management and fisheries, including carbon sequestration benefits, climate change impacts and adaptation measures, seed production and breeding, and ex-situ conservation of endangered species;
 - (vi) Strengthening community-based beel institutions; and
 - (vii) Establishing a beel management monitoring system through the development of a project information system and a beel fisheries knowledge platform, aligned with the state wetland authority's wetland notification process.
3. **Output 2: Community-based fisheries business developed and beel community income diversified.** The project will ensure the sustainability of beel community-based institutions by enhancing their financial viability and strengthening women's and marginalized groups' participation in economic activities. The project will:
- (i) support the development or strengthening of fisheries cooperatives;
 - (ii) conduct capacity building for these cooperatives through training in organizational and financial management, as well as branding, marketing and processing along the value chain;
 - (iii) provide public sector support for the development of community-based fisheries value chain infrastructure, including fish landing sites and local aggregation points/centers;
 - (iv) promote private sector led fisheries commercialization by creating matching grant facilities for hatchery, feed mill, primary processing and other value addition initiatives; and
 - (v) support other income generation activities for self-help groups (SHGs) through strengthening or revitalizing self-help groups based on their needs assessment.
4. **Output 3: Beel conservation and restoration planned and managed.** The project addresses habitat loss caused by the loss of connectivity with the adjacent river and decreasing water depth, and macrophyte growth that hinders fisheries productivity in beels. The beel restoration approaches will focus on:
- (i) beel demarcation;
 - (ii) beel rejuvenation, such as de-weeding and desilting; and
 - (iii) beel's water inflow and outflow control improvement, including desilting, constructing embankments, installing silt traps, building water retaining structures and peripheral bunds, and installing biofilters.
5. The Project is targeting 102 beels under this project across the state of varying size i.e. Large (50-300 ha), Medium (15-50 ha) and Small (0-15 ha). For project readiness, around 74 beels in priority has been selected for phase-1 financing and implementation. The balance number of beels to be implemented under phase-2 will be subsequently selected during the phase-1 implementation and soon. Having similar project components for similar nature of beels the resettlement impact is also envisaged as similar for all beels under different categories. A list of 74 beels with preliminary assessment of social safeguards is provided in **Chapter II**.

Table 1: Output wise Subproject Components

S.No.	Output	S.No.	Component	Subcomponent
1	Output 1: Institutional capacity and regulatory framework for Sustainable beel ecosystem and fisheries management strengthened	1	Update relevant beel management and fishery acts, regulations, and rules	- Identify critical areas for updates for community-based beel ecosystem and fisheries management - Prepare and announce rules or guidelines for the community-based beel co-management system - Prepare a sustainable operational model (project exit-plan)
		2	Capacity building and training of DOF staff and other allied public	Conduct training and exposure visits for Department of Fisheries (DoF) staff and other allied public institution staff, including the State Wetland Authority

S.No.	Output	S.No.	Component	Subcomponent
			institutions	
		3	Strengthen or develop beel community-based institutions (or beel development committee)	- Support beel development committees and Panchayats in preparing operational guidelines for beel development committees - Conduct training on group management, facilitation, financial management, and community-based procurement for beel development committees - Conduct training for beel development committee members on sustainable beel ecosystem management, best practices, and climate change - Support beel development committees in preparing integrated beel management plans, including O&M procedures and consideration of wetland notification - Support implementation of integrated beel management plans, including leasing support and performance-based matching grants - Conduct audits and performance appraisals of beel development committees
		4	Establish and operate beel management monitoring system	Develop project MIS, including FM module, and beel fisheries KM platform, complementing wetland notification process
		5	Establish and operate the project management unit	KM materials
2	Output 2: Community-based fisheries business developed and beel community income diversified.	1	BDC capacity building and inclusion in fisheries VC	- Provide training in organizational management, facilitation, business plan development, and financial management - Conduct a market survey
		2	Public support for community-based fisheries value chain infrastructure development	- On-beel infrastructure - Off-beel infrastructure
		3	Private sector and entrepreneurial-led fisheries commercialization	- Operation of the beel fisheries business development fund - Development of fee-based extension services for improved fish production practices - Conduct training and exposure visits on branding, market development, and innovative processing and packaging along the value chain
3	Output 3: Beel conservation and restoration planned and managed	1	Beel demarcation	- Demarcation/up-dation of boundaries on cadastral map - Posting of pillars around the beel boundary
		2	Beel rejuvenation	- De-weeding - Desilting - Earthen mounds
		3	Beel inflow and outflow control improvement	- Desilting of beel connecting channels - Construction of embankments - Installation of silt traps - Construction of water retaining structures and peripheral bunds - Installation of hume pipes
		4	Beel conservation and restoration design for additional target areas	Preparation of Detailed Beel conservation and restoration design plan as developed under the technical supervision of the ICAR-CIFRI, WISA and ASWA in consultation with the experts of PIU and PMU

C. General Profile of the Project Area

6. The project is proposed to be implemented in 24 districts of Assam. The entire project area has already been divided into 5 clusters- North Assam, Lower Assam, Central Assam, Upper Assam and South Assam, which will act as project implementation units (PIUs) (**Figure-1**).

Figure1: Sub project Locations

7. As per the 2011 census, the total population of Assam is 3,12,05,576; with a decadal growth of population 17.07%. The sex ratio in Assam is 958 women for each 1000 men; and it has improved substantially over the last decade. The tribal population is 38,84,371, which is 12.4% of the total population of the state.
8. Assam is predominantly an agrarian state due to having vast alluvial plains of Brahmaputra and Barak rivers. The principal food crops produced in the state include rice (paddy), maize (corn), pulses, potato, and wheat. In the interior hill areas, tribal communities practice shifting cultivation (jhum), where mixed crops are grown alongside paddy. The principal cash crops are tea, jute, oilseeds, sugarcane, cotton, coffee, rubber and tobacco. Tea is the most important cash crop in Assam; and makes up for more than 50% of all India production.
9. According to the NITI Aayog Multidimensional Poverty Index (2023), Assam has demonstrated significant progress in poverty reduction, achieving a notable decline of 13.3% in multidimensional poverty, while continuing efforts to address the remaining 19.35 % of the population still experiencing deprivation. The estimated Per Capita Income of Assam at constant prices for FY 2025-26 is ₹ Rs 93,351, a rise from Rs. 85,503 in FY 2024-25 (Quick Estimate), reflecting a growth of 9.18 %. Also, among eight States of the Northeastern Region, Assam is most industrially advanced State. Assam is endowed with petroleum, natural gas, coal, limestone and many other minor minerals such as magnetic quartzite, kaolin, clay and feldspar. The Upper Assam districts are major reserves of oil and gas. It is estimated that Assam and surrounding region possess around 150 million tons of petroleum reserves. Presently, Assam is the 3rd largest producer of petroleum (crude) and natural gas in the country accounting for 16% and 8% respectively of the total production of this mineral in the country. A Tertiary coal belt is in Tinsukia, Dibrugarh, Sivasagar, Karbi Anglong and Dima Hasao districts with an estimated reserve of 370 million tons. Papers, cement, Petrochemical are some other industries of Assam.
10. The State of Assam is situated just below the eastern Himalayan foothills and lies between 89°5'-96°1' East and 24°3'-27°58' North covers an area of 78, 438 sq km. Assam is surrounded by six of the other seven north-eastern states (together called as 'seven sisters'): Arunachal Pradesh, Nagaland, Manipur, Mizoram, Tripura, and Meghalaya. Geographically Assam and these States

are connected to the rest of India via a strip of land in WestBengal called the Siliguri Corridor or "Chicken's Neck". Assam shares international borders with Bhutan and Bangladesh. Topographically it can be divided into three distinct zones: the Brahmaputra valley in the north; the Hills of Karbi Anglong and Dima Hasao; and the Barak valley in the south.

D. Project Impacts and Benefits

11. The direct impact of the project will be the restoration and sustainable development of beels resulting in increased fish production and enhanced livelihood for local communities including ST people in project areas. The project will not result in any adverse impact on beel communities including the STs since acquisition of land and adverse impact on private property is not involved in any of the project components. Scheduled Tribe (ST) communities in Assam are traditionally engaged in beel fishing for their own consumption. Fish forms an important part of their diet and is often available at little or no cost. The project will restore such *beels* and enhance fish production to ensure sustainable livelihoods for beel-dependent communities in the future. The proposed interventions will strengthen their food security in a resourceful environment, providing them with the opportunity to participate in beel management and livelihood planning.
12. In addition to beel restoration and increased fish production, the project aims to boost rural employment and income by promoting alternative livelihood activities at the BDC and village levels. Scheduled Tribe (ST) communities in Assam possess traditional skills in handloom and weaving, producing much of their own clothing using wooden handlooms. Animal husbandry, piggery, poultry, and the preparation of plant-based by-products are other common livelihood activities at the village level. With the proposed interventions, these communities will have opportunities to access training and materials to engage in commercial activities. This is expected to enhance incomes and reduce the need for migration in search of casual labor.
13. Conservation efforts will include stocking hatchery-produced seeds to preserve endangered fish species, with designated areas in some beels reserved for this purpose. Additionally, aquatourism will be developed in selected beels, carefully balancing potential environmental impacts with economic benefits. A significant focus of the project is to increase the involvement of women in beel management and fish marketing. Women, including those from Scheduled Tribe (ST) communities, will be equipped with skills in basic fish processing and the production of value-added fish products, along with training in effective marketing techniques. The project also emphasizes youth engagement, with training in modern fish harvesting techniques, beel management, nursery rearing, and advanced fish production using the latest technologies.
14. By amplifying fish production and associated activities across the entire value chain of beel fisheries, the project endeavors to uplift the socio-economic status of communities including STs, particularly in rural areas. A key focal strategy involves the active inclusion of ST women in aquaculture and fish processing endeavors, underscoring gender equality and empowerment objectives. Capacity building initiatives, facilitated through training programs, constitute an essential component of the project's strategy. The BDCs will prepare their respective livelihood plan with participation from all communities and submit to the IA before execution. Other stakeholders will also be engaged for training, value chain development and marketing of the local products.

E. Measures to Avoid Resettlement and Livelihood Impacts

15. Adequate attention has been given during the feasibility and detailed design phases of project preparation to avoid involuntary resettlement and livelihood impacts. Any temporary impacts identified during construction will be minimized by adopting the following measures.
 - a) All on- beel and off-beel construction activities will be carried out on government land following the Guidelines for implementing Wetlands (Conservation and Management) Rules, 2017, and project approved Environment Management Plan (EMP).
 - b) Beels having dual land ownership (private and govt) will be included under the project

- and civil work can be initiated only after signing the MoU between landowner and IA.
- c) The construction schedule will be finalized in consultation with the local and ST community's and barricading the construction area to ensure minimum disruption to their ongoing livelihood activities.
 - d) Information dissemination of the work schedule prior to the commencement of work on the beel.
 - e) Installation of information bill boards, including GRM contact information.
 - f) Provision of temporary access to beel, such as using wooden planks and as suggested in the EMP.
 - g) The existing roads to the beels will be used for transporting construction materials. Construction activities will, as far as possible, be confined within the project roads and the Right of Way (RoW). Any new access roads will be developed only on government land.
 - h) The BDC will be established to ensure community involvement in the project implementation.
 - i) The proposed interventions under the subproject will increase fish production and create additional livelihood opportunities for local people, including Scheduled Tribes (STs). This will serve as a long-term measure to offset any livelihood impacts that may arise during construction.
 - j) The Social Safeguard and Gender Specialists will monitor and report any social impact during construction to IA and ADB through its periodic monitoring reports.

F. Scope and Objective of Indigenous Peoples Plan

16. The aim of this IPP is to ensure that STs - **(i)** receive culturally appropriate social and economic benefits; **(ii)** do not suffer adverse impacts because of project interventions; **(iii)** can actively participate in the subprojects and livelihood interventions free from coercion, and **(iv)** meaningful consultation is conducted. The Social Impact Assessment and the IPP are adequate to mitigate potential impacts and ensure participation of STs. The project is category B for IP safeguards due to its positive impact to the STs, and the IPP has been prepared in compliance with ADB SPS 2009. The issues identified and addressed in this document are as follows:
- (i) Impacts on STs, vulnerable groups like poor, women, and other disadvantaged groups of society;
 - (ii) Meaningful consultation and STs' participation in the project;
 - (iii) Existing legal and administrative framework for safeguarding STs' rights;
 - (iv) Formulation of livelihood intervention for the STs;
 - (v) Cost estimate for livelihood intervention including provision for fund; and
 - (vi) Institutional framework for the implementation of the plan, including grievance redress mechanism, and monitoring and reporting.

G. Methodology for Indigenous Peoples Plan

17. Due diligence was carried out through site visits, meaningful consultations with STs and other stakeholders through focus group discussions (FGD) and individual interviews, and review of feasibility studies, detailed project reports, and socio-economic survey conducted for the proposed priority subprojects **(Appendix-1)**. The subprojects other than priority beels/subprojects will be assessed and screened using the IP impact screening checklist provided in **Appendix-2**. Further due diligence and meaningful consultation will be conducted by IA, and the IPP will be updated.

II. SOCIAL IMPACT ASSESSMENT

A. Socio-economic Profile of Scheduled Tribes

18. In India, STs constitute about 8.6% of the total population (census 2011) or more than 104 million people, under 645 ethnic groups. In Assam, the tribal population is 38,84,371, which is 12.4% of the total population of the state. The tribal in Assam constitute 3.72% of total tribal population of the country. The State has registered 17.4% decadal growth of tribal population in 2001-2011 which is slightly higher than the overall decadal growth for the state. The overall sex ratio among tribal people is 984, which is marginally less than the national average of 990. The tribal population in Assam is predominantly rural with 94.4% residing in rural areas. The ST population in India and Assam state is given below.

Table2: Scheduled Tribes Population in India and Assam

State	Total Population	Schedule Tribe Population			% of total State/Country Population
		Total	Male	Female	
Assam	31,205,576	3,884,371	1,957,005	1,927,366	12.4%
All India	1,210,569,573	52,409,823	51,871,211	104,281,034	8.6%

Source: Census of India, 2011

19. Assam is an ethnically diverse state with a wide range of languages, traditions, and cultural practices. It is home to numerous ethnic tribes and communities, contributing to a rich cultural tapestry. Major tribes in Assam include Bodo (35.1%), Mishing (17.52%), Karbi (11.1%), Rabha (7.6%), Sonowal Kachari (6.5%), Lalung (5.2%), Garo (4.2%), and Dimasa (3.2%), together accounting for about 90% of the Scheduled Tribe (ST) population of the state. Other tribal communities in Assam include Deori, Hajong, Thengal Kachari, Khasi, Jaintia, Mech, Chakma, Mizo, Hmar, Kuki, Naga, Barman (in Cachar), Tai-speaking groups, Khampti, and Singhpho. The spatial distribution of the tribal population in Assam can broadly be classified into two groups: hill tribes and plain tribes. Seven districts of Assam have an ST population exceeding 25%. Details are provided in the table below

Table3: Districts of Assam having more than 25% ST Population

S.No.	District	Total Population	ST Population	Percentage of ST
1	Dima Hasao	214,102	151,843	70.9
2	Karbi Anglong	956,313	538,738	56.3
3	Dhemaji	686,133	325,560	47.4
4	Baksa	950,075	331,007	34.8

Source: Census of India, 2011

20. The above seven districts together account for 53.3% of the Scheduled Tribe (ST) population of the state. Inter-district variation in ST population across other districts is quite significant—ranging from as low as 0.1% in Hailakandi district to about 23% in Goalpara and 23.9% in Lakhimpur. Another notable aspect of the distribution is that most plain tribes are concentrated in the Brahmaputra Valley, while only a small proportion resides in the Barak Valley.
21. The literacy rate among tribal people in Assam is 72.1%, which broadly mirrors the overall literacy rate of the state; and is well above the national average. However, the gap between the male and female literacy rate (79% & 65% respectively) highlights that tribal women are still lagging behind on educational attainment.
22. The overall economic condition of an average tribal household appears to be similar (or slightly better) than that of an ordinary household. In Census 2011, only 18.6% tribal household had reported absence of any durable household assets, which is 5 percentages lower than that of all social groups. According to Socio Economic and Caste Census 2011 (for rural areas), the

Autonomous Councils, which are established through specific legislative acts. These councils are created through state legislation, rather than constitutional provisions, and serve to manage the affairs of specific tribal groups or communities in the state. These Statutory Autonomous Councils are constituted for social, economic, educational, ethnic and cultural advancement of the scheduled tribe communities living in core areas as well as in satellite areas covering many districts of Assam. Certain villages in a district with substantial tribal population are notified under the statutory autonomous council.

C. Tribal Population in Project Districts

27. The 24 districts primarily selected by DoF have significant number of tribal populations of different ethnicity and clan. The areas having a high concentration of tribes are governed by sixth schedule autonomous councils and statutory autonomous councils formed to safeguard tribal rights. The tribal proportion in district population is given below in table 5.

Table 5: Tribal Population in Project Districts

	District Name	Total Population	% of ST Population	Remarks (villages / area under statutory/ sixth schedule autonomous council)
1	Kokrajhar	887,142	31.4	Bodoland Territorial Council
2	Dhubri	1,949,258	0.3	
3	Goalpara	1,008,183	23	Rabha Hasong Autonomous Council
4	Barpeta	1,693,622	1.6	
5	Morigaon	957,423	14.3	Tiwa Autonomous Council

D. Project Impact on Scheduled Tribes

28. The STs will benefit from the proposed subproject interventions in 24 districts of Assam. The project will help ST communities in protecting their source of livelihood i.e. beel-based livelihood system. Thus, positive impacts on ST communities are envisaged. The project does not adversely affect the dignity, human rights, livelihood systems, or culture of Indigenous Peoples or affects the territories or natural or cultural resources that Indigenous Peoples own, use, occupy, or claim as their ancestral domain.
29. The 74 beels identified as priority subprojects under the project have been assessed, and a review of revenue records indicates multiple types of ownership. Approximately 24,000 households are associated with these beels and are expected to benefit from the project.
30. Of the 74 beels, the majority are on government land, except for eight (8). Among these, four beels located in Biswanath, Golaghat, and Dhemaji districts are situated on mixed land,

comprising both government and private ownership. Additionally, four beels in Jorhat and Barpeta districts are located on *Satra* land. It may be noted that beels under individual, private, or institutional ownership were originally agricultural or barren land that gradually transformed into wetlands due to changes in water flow. While land use has changed naturally over time, ownership has remained unchanged. These beels have been included in the project based on the willingness of the owners and local communities, and Memorandums of Understanding (MoUs) will be signed accordingly. Prior to execution of the MoUs, necessary due diligence will be carried out in line with project guidelines and applicable provisions. During community consultations, private landholders and Satra representatives were informed that an appropriate benefit-sharing mechanism will be developed in consultation with all stakeholders to ensure equitable participation and fair distribution of benefits arising from the development and management of the beels

31. Among the 74 priority sub-projects, five (5) *beels* are located in Kokrajhar district, which falls within the administrative jurisdiction of the Bodoland Territorial Council constituted under the Sixth Schedule of the Indian Constitution. Considering the substantial presence of tribal communities in the area, the project will adopt measures to ensure equitable access to project benefits and will design culturally appropriate mechanisms for inclusive participation and benefit-sharing. As an institutional inclusion mechanism, the Bodoland Territorial Council has provided a No Objection Certificate (**Appendix-3**) to the SWIFT Project, thereby endorsing the implementation of project activities in the beels located within its jurisdiction in Kokrajhar district.

Table6: Summary of Potential Impact on Scheduled Tribes (STs)

Sl no.	Subproject Location	District	ST HHs	Name of ST groups	Potential Negative Impact	Potential Positive Impact

32. To ensure that Scheduled Tribes (STs) are adequately informed, consulted, and mobilized to participate in the subprojects during project preparation, and to ensure equitable sharing of benefits, this Indigenous Peoples Plan (IPP) has been prepared.

III. STAKEHOLDERS CONSULTATION, PARTICIPATION, AND INFORMATION DISCLOSURE

A. Stakeholders Consultations

33. Primary stakeholders include villagers, project beneficiaries, members of Village Development Committees (VDCs) and Beel Development Committees (BDCs), fishermen, members of Self-Help Groups (SHGs), farmers, government officials, and public representatives. Secondary stakeholders include the Department of Fisheries (DoF), Assam State Space Application Centre, Revenue Department, non-governmental organizations (NGOs), Forest Department, Water Resources Department, Central Inland Fisheries Research Institute, WorldFish, Wetlands International South Asia, the State Wetland Authority (SWA), and other relevant departments, NGOs, and business communities in the project area. Consultations with these stakeholders were conducted during various stages of project preparation. A list of stakeholders consulted on specific issues is provided below.

Table7: List of Stakeholders Consulted

S.No.	Name of Person	Issue Discussed	Contact Number
1	Dr. Ramen Barman Dy Project Director, SWIFT-ADB DoF	Overall project description, design, information and coordination site visit and stakeholder consultations.	9435114529 8724814464
2	Mr. Gauri Shankar Das (ACS), Project Director, DoF	Sharing of site visit observations, discussion on IPP, GRM, and Institutional arrangement, requested an undertaking for no land acquisition	7002543437
3	Mr. Pabitra Talukdar, Nodal Officer, ADB project, DoF	Contact details of district fishery development offices and coordination	7002081620
4	Dr. Bhagaban Kalita, Marketing Officer, DoF	Status of fishery in assam, beel fishery, marketing and benefit to common people	7002923879
5	Officer Revenue Department, Dhubri district.	Beel land ownership, Challenges in beel demarcation, availability of maps	-

DoF=Department of Fishery, NGO=Non-governmentalOrganization, DFDO=District Fishery Development Officer.

B. Meaningful Consultation

34. Meaningful consultations were arranged at the stage of project preparation to ensure peoples' participation in the planning phase of this project and to treat public consultation and participation as a continuous process during the project preparation, implementation, and monitoring. To promote public understanding and identify solutions to development challenges, various groups of beneficiaries and other stakeholders were consulted through focus group discussions and individual interviews. Consultations with ST communities were held separately. The ST communities will also be consulted in proposed locations during planning and execution of subsequent phases under the project.
35. During the planning phase, various beels (wetlands) across different districts and under different townships were revisited. These visits were conducted in collaboration with officials from the Department of Fisheries, District Fisheries Development Officers (DFDOs), and representatives from Beel Development Committees (BDCs). Additionally, some model beels from the APART project were visited to assess the successes and challenges of beel fisheries and their management. These visits provided a detailed understanding of the socio-economic and environmental dynamics of various beels, both registered and unregistered.
36. The selection of the site was based on field assessment and consultation among the Project team and other stakeholders involving village people of proposed subprojects. Priority beels identified during the project readiness phase were assessed by the ADB safeguards consultant team, along with District Fisheries Development Officers (DFDOs), as part of the social due diligence process. These consultations were organized at the village level, facilitated by the Department of Fisheries (DoF), in alignment with the objectives of ADB's SPS of 2009.

During these discussions, members of the Beel Development Committees, project beneficiaries, and near by communities were informed about potential social impacts and proposed mitigation strategies. The meetings also covered important topics, such as Project Operation and Maintenance (O&M), the Grievance Redress Mechanism (GRM), and aspects related to project livelihoods. A total of 74 consultation meetings and focus group discussions were organized with more than 2700 community members including 1700 males and 1052 female during initial subproject screening, and due diligence. There was substantial representation of women and indigenous communities. The details of public consultations, list of participants and consultation photographs are given in **Appendix-4**. The details of consultations held are given below:

37. During consultations, Scheduled Tribe (ST) communities were informed about the proposed subproject interventions under the SWIFT Project. They were encouraged to share their views and suggest appropriate solutions to address existing challenges. The key concerns raised and the social dynamics expressed by the community members are summarized below

People's Suggestion:

- (i) The Scheduled Tribe (ST) community expressed concerns over the deteriorating condition of their beel fisheries due to the unchecked growth of water hyacinth, siltation, pollution, and declining fish productivity. Beel management committees reported limited capacity to address these issues due to lack of financial resources for de-weeding and desiltation. The community emphasized the importance of the project and the need for appropriate restoration measures to improve livelihoods.
- (ii) Although rules and regulations exist at the Beel Development Committee (BDC) level, they are not consistently enforced. Due to limited funding and lack of government support for de-weeding and desiltation, many beels are heavily covered with water hyacinth, lotus, and lily vegetation, resulting in reduced fish productivity.
- (iii) The ST community generally has no objection to the construction of beel boundaries. However, some members expressed concerns about potential loss of adjacent farmland and fishing rights once the beels are brought under the project. District-level Department of Fisheries (DoF) staff are addressing these concerns through consultations and awareness efforts. No cases of encroachment have been reported in the subprojects.
- (iv) The ST community has shown strong willingness to participate in the project, as beels remain a major source of livelihood and income. Fish is a staple part of their diet and is consumed on average five days a week, contributing both to nutrition and household income.
- (v) Strong community ownership of beels is evident. In ST communities, beels are not only a source of livelihood but also hold cultural and ritual significance. They are associated with local fairs and festivals, and beel water is considered sacred on certain occasions. Community fishing events are organized during Bihu festivals, sometimes attracting visitors and generating income.
- (vi) In all ST villages, women are members of Self-Help Groups (SHGs) formed under the Assam State Rural Livelihood Mission, which serve as platforms for mutual support and empowerment. ST women are highly skilled in traditional handloom activities. Many SHGs have accessed bank loans for income-generating activities such as poultry, piggyery, weaving, and livestock rearing. Most women have individual bank accounts.
- (vii) Communities acknowledged the positive impacts of ongoing projects such as the Assam Agribusiness and Rural Transformation Project, particularly in beel management and fish farming. They are generally well-informed about project structures and how to benefit

from them.

- (viii) Migration for employment among ST communities is relatively low. During consultations, youth (both male and female) expressed strong interest in training on food processing, value addition, marketing, and exploring beel-based tourism opportunities at the local level.
- (ix) In terms of social security schemes, ST communities have access to most available programs. Strong community networks, social norms, and established local governance structures under autonomous administration further support their social security and well-being.

The participants were informed about the proposed de-weeding and de-siltation techniques for beels, along with the soft interventions to be implemented under the project. The formation and role of Beel Development Committees (BDCs) were highlighted as key mechanisms for the effective management and sustainable use of beels and associated assets. Participants were also informed that coordination with line departments such as Fisheries, Revenue, Tourism, Forest, and Public Works will be ensured to enhance infrastructure, services, and livelihood opportunities at subproject locations. The beel communities expressed optimism about the upcoming SWIFT Project and indicated their expectations regarding the potential benefits outlined below:

- (i) Organized beel management and increased fish production;
- (ii) Opportunities for alternate livelihood activities and enhanced income for women in SHGs;
- (iii) Control on youth out-migration;
- (iv) Ease of doing fishing and fish related business for local fishermen; and
- (v) New avenues of income generation will come up.

38. The community does not anticipate any negative impacts from the project, as activities will be carried out on government land. Based on focus group discussions (FGDs) and consultations with the general population and women, the perceived benefits and potential impacts of the proposed project are presented in the table below.

Table9: Perceived Benefits and Losses

Consultation Matrix of FGDs			
No.	Issues Raised	Suggestions by Participants	Feasibility Options
Perceived Benefits			
1.	Employment during project implementation	Project should provide employment to the local people	The local people including ST community will be engaged in removal of water hyacinth and other vegetations from the beels.
2.	Development of infrastructure near beel.	Infrastructures like fish collection centre, resting place and washrooms for women etc. should be provided near the beel boundaries.	The location of the infrastructures will be determined after due consultation with the community.
3.	Beel Management	Local people should be involved in beel management activities.	BDC will be formed including local people and STs. The local people including STs will have opportunities to work in SHGs linked with the BDC and fish cooperatives.
4.	Business Opportunity	Most of the people in project villages are dependent on beel-based livelihood activities. More avenues need to be explored.	Training will be given to BDCs to formulate livelihood plan under the project.

Consultation Matrix of FGDs			
No.	Issues Raised	Suggestions by Participants	Feasibility Options
Perceived Losses			
No.	Issues Raised	Peoples' Perceptions	Feasibility Options
1.	Loss of agriculture land near the beel	The agriculture land adjacent to beel will be lost by the owner during demarcation of beel	The beel demarcation will be done using cadastral maps and in presence of revenue official and Villagers.
2.	Heavy Traffic Movement and loss of pathways	The machinery movement may destroy the local pathways approaching to beel.	Machinery movement will be controlled and route planning and minimization shall be done. Provisions for restoration of local assets like pathway etc. will be taken care of by the contractor.
3.	Noise Pollution	Heavy noise will disturb to the inhabitants during project implementation	Measures will be taken as per EMP to control noise pollution
4.	Loss of livelihood	The local people will be restricted to catch fish during the project implementation.	No such restriction will be made since the de-siltation and de-weeding work will be conducted at corner leaving large beel area open for fishing.
5.	Training /Awareness Program on beel management And safety.	Training/awareness about beel management to the villagers is required. More security options need to be evaluated for fishermen.	Awareness /training programs on beel management will be provided to members of BDCs.

39. The outcomes of the consultations were shared with the project team during the design phase. The IA will ensure participation and representation of ST communities in BDCs. Community engagement, public consultations and disclosure will be an ongoing exercise through the subproject planning and implementation phase. The consultation process will be recorded and documented in the semi-annual social monitoring reports by the DoF.

C. Information Disclosure

40. Several additional rounds of consultations with STs will form part of the further stages of project preparation and implementation. The NGO/firm/government institution involved in implementation of *beel* fisheries business development fund operation will be entrusted with the task of conducting these consultations during IPP implementation, which will involve disclosure on need assessment, training programs, assistance and in come restoration measures suggested for the project. The consultation will continue throughout the project implementation period.
41. It is imperative to inform the STs about the construction schedule, activities during de-weeding, de-siltation and demarcation of beels. This ensures that their daily routine of fishing remains unaffected. To enhance transparency in planning and encourage active involvement of STs and other stakeholders, project information will be disseminated through disclosure of safeguards documents and IPP to the STs and on ADB's website. The summary of the IPP will be disclosed to the ST communities in a manner and language acceptable and understandable to them through consultation:
- Draft IPP;
 - Final IPP;
 - New IPP and a corrective action plan prepared during implementation, if any;
 - Grievance redress mechanism; and
 - Semi annual safeguards monitoring reports.
42. Consultations will be carried out in all proposed subproject locations by the DoF's Social Safeguards and Gender Specialists. This IPP will be updated further with new consultation minutes, photos and details of participants. A future consultation and disclosure plan is provided in the table below

Table 11: Further Consultation and Disclosure Plan

Activity	Task	Timing (Date/Period)	Agencies
Sharing of beel restoration Schedule with beel communities, and STs	Notify the schedule	September 2026	Social Safeguard & Gender Coordinator/ Contractor/ BDC
Disclosure of IPP	Translate IPP in Assamese, Bodo and Bengali and disclose at BDC office, Panchayat	August 2026	PIU's Social Safeguards and Gender Specialist
Distribution of training and assistance information leaflet	Prepare IPP information leaflet and distribute to STs	January 2027	CPIUs Social Safeguard Coordinators
Disclosure of the final IPP	Disclose IPP on ADB and IA/EA websites	December 2026	PIU's Social Safeguards and Gender Specialist

ADB=Asian Development Bank, EA=Executing Agency, IPP=Indigenous People Plan, PIU = project implementation unit, BDC = Beel Development Committee.

IV. LEGAL FRAMEWORK

A. Introduction

43. The legal framework and principles adopted for addressing IP issues in the project have been guided by the existing legislation and policies of the Government of India (GOI), the Government of Assam and Asian Development Bank.
44. IPs are defined as those having a distinct social, cultural, economic, and political traditions and institutions compared with the mainstream or dominant society with the following characteristics:
- (i) descent from population groups present in a given area before territories were defined;
 - (ii) maintenance of cultural and social identities separate from dominant societies and cultures;
 - (iii) self-identification and identification by others as being part of a distinct cultural group;
 - (iv) linguistic identity different from that of dominant society;
 - (v) social, cultural, economic, and political traditions and institutions distinct from dominant culture;
 - (vi) economic systems oriented more toward traditional production systems rather than mainstream; and
 - (vii) unique ties and attachments to traditional habitats and ancestral territories.⁷ In India the people bearing above characteristics are termed as Scheduled Tribes (ST) under the law of Indian Constitution.

B. Constitutional Safeguards in the Country's perspective

45. The Indian Constitution's Article 366 (25) refers to IPs (STs) as those communities who are scheduled in accordance with Article 342 of the Constitution. According to Article 342 of the Constitution, they are the tribes or tribal communities or part of or groups within these tribes and tribal communities which have been declared as such by the President through a public notification.⁸ The constitutional protective provisions safeguard tribal people from social injustices and all forms of exploitation, while the developmental provisions promote educational and economic interests. Further, administrative provisions under the Fifth Schedule and Sixth Schedule of the Constitution provide special provision for tribal autonomy and welfare in selected regions of the country. The Sixth Schedule is specifically applicable for Assam (and other Northeastern States of Meghalaya, Tripura and Mizoram).

(i) Schedule Areas under Sixth Schedule of the Constitution

46. The Sixth Schedule under Article 244(2) of the Constitution of India provides for the establishment of Autonomous Councils to administer tribal areas in Assam. These include Karbi Anglong and Dima Hasao districts, as well as the four Bodoland Territorial Autonomous Districts (BTAD)—Kokrajhar, Baksa, Chirang, and Udalguri. These Autonomous Councils in Scheduled Areas are vested with legislative, executive, judicial, and financial powers for the benefit of tribal communities. They are also responsible for overseeing traditional institutions within local tribal societies:
- **Karbi Anglong Autonomous Council (KAAC):** The Karbi Anglong Autonomous Council was established as part of the formation of Karbi Anglong as a full-fledged district. The council covers the three subdivisions of Diphu, Bokajan, and Hamren.

⁷ADB Policy Paper, Safeguard Policy Statement, 2009

⁸Article 366 (25) and Article 342 of The Constitution of India, 1949.

- **Dima Hasao Autonomous Council (DHAC):** The Dima Hasao Autonomous Council is constituted to administer the district and promote the development of the Dimasa community. It covers the two subdivisions of Haflong and Maibang.
- **Bodoland Territorial Council (BTC):** The Bodoland Territorial Council administers the Bodoland Territorial Region, comprising four administrative districts—Udalguri, Baksa, Chirang, and Kokrajhar

47. These Autonomous Councils have been granted the authority to make laws within their jurisdiction on subjects delegated to them. Any Act of the State Legislature on matters within the legislative competence of a District or Regional Council does not automatically apply to an autonomous district or region unless the respective Council directs its applicability within Scheduled Areas under its jurisdiction.
48. The Autonomous Councils are empowered to constitute traditional Village Councils or courts to adjudicate disputes among parties belonging to Scheduled Tribes. They may appoint suitable persons as members or presiding officers of such bodies for the administration of justice. The Councils also exercise appellate jurisdiction over cases decided by these traditional Village Councils.
49. In the Sixth Schedule areas of Karbi Anglong and Dima Hasao, a traditional system of land tenure is practiced at the village level, where communal ownership of land is the norm. In most cases, formal land titles are not available with customary landholders. Many villages do not have fixed boundaries, as settlements may shift over time, and village names are often derived from the name of the traditional village headman. Land records are maintained through customary systems by the Autonomous Councils. However, in the Bodoland Territorial Council (BTC) area, the revenue administration system is largely similar to that followed in the non-Sixth Schedule plains areas of Assam

(ii) Autonomous Tribal Councils established by State Legislations

50. In addition, the Government of Assam has constituted six other Autonomous Councils through enactment of law in the State Legislature for social, economic, educational, ethnic and cultural advancement of tribal communities in these autonomous council areas. These Autonomous Councils are entrusted with the responsibility of formulating integrated development plans for the Council Area and implementing development schemes and programs in adherence to the general policy of the Government. The Council is also authorized to guide customs and traditions of the Scheduled Tribe communities according to the traditional laws. The Autonomous Councils established through State Legislation are:
 - **Mising Autonomous Council (MAC):** The council covers as 'Core Area' as well as 'Satellite Areas' in eight districts namely, Dhemaji, Lakhimpur, Sonitpur, Golaghat, Jorhat, Sibsagar, Dibrugarh and Tinsukia;
 - **Rabha Hasong Autonomous Council (RHAC):** The jurisdiction of this council extends upto Rani area of Kamrup district and except some parts of Matia, Balijana and Lakhimpur revenue Circles, it embraces almost the entire district of Goalpara;
 - **Tiwa Autonomous Council (TAC):** The council covers the western areas of Karbi Anglong district and parts of the southern bank of the Brahmaputra Valley, primarily in Morigaon and Nagaon districts, where the Tiwa community resides;
 - **Deori Autonomous Council (DAC):** The council area is dispersed across medium and small villages, as well as parts of villages and settlements, in seven Upper Assam districts – viz. Dhemaji, Lakhimpur, Sonitpur, Jorhat, Sibsagar, Dibrugarh, and Tinsukia—where the Deori community resides;
 - **Thengal Kachari Autonomous Council (TKAC):** The council area is scattered in Jorhat, Golaghat, Dibrugarh, Lakhimpur, Dhemaji and Karbi Anglong districts of Assam;

- **Sonowal Kachari Autonomous Council (SKAC):** The council covers 450 villages within the jurisdiction in seven districts of Upper Assam, viz. Dibrugarh, Tinsukia, Dhemaji, Lakhimpur, Sivsagar, Jorhat and Golaghat;

51. The administrative jurisdiction of these Autonomous Councils extends over Village Councils formed from clusters of contiguous revenue villages, each having 50% or more Scheduled Tribe (ST) population, along with other ST communities residing in the area. The General Council consists of 20 elected members and two members nominated by the Government of Assam. Members of Parliament and Members of the Legislative Assembly of Assam representing Scheduled Tribe-reserved constituencies within the Council area serve as ex-officio members. The elected members of the General Council constitute the Executive Council, which includes the Chairman, Deputy Chairman, Chief Executive Councillor, Deputy Chief Executive Councillor, and other Executive Councillors. Executive authority is vested in the Executive Council, headed by the Chief Executive Councillor.
52. The administrative jurisdiction of these Autonomous Councils extends over Village Councils formed from clusters of contiguous revenue villages, each having 50% or more Scheduled Tribe (ST) population, along with other ST communities residing in the area. The General Council comprises 20 elected members and two members nominated by the Government of Assam. Members of Parliament and Members of the Legislative Assembly of Assam representing Scheduled Tribe-reserved constituencies within the Council area serve as ex-officio members. The elected members of the General Council constitute the Executive Council, which includes the Chairman, Deputy Chairman, Chief Executive Councillor, Deputy Chief Executive Councillor, and other Executive Councillors. Executive authority is vested in the Executive Council, headed by the Chief Executive Councillor

(iii) Legal Provisions to Safeguard Schedule Tribe Interests

a. National Commission for Scheduled Tribes

53. The bifurcation of the National Commission for Scheduled Tribes from the National Commission for Scheduled Castes and Scheduled Tribes was carried out under the 94th Amendment Act of the Constitution of India. Although the National Commission for Scheduled Tribes was established in August 2003, limited progress has been made in terms of budgetary and staffing support to make the Commission fully functional.
54. One of the duties assigned to the National Commission for Scheduled Tribes and Scheduled Castes is to submit reports to the President annually or at such other time as the Commission may deem fit, upon the working of the safeguards.

b. The SCs/STs Prevention of Atrocities Act, 1989

55. The objectives of the Act are to affirm the commitment of the State to ensure justice for Scheduled Castes (SC) and Scheduled Tribes (ST) through affirmative action, enabling them to live with dignity, self-esteem, and without fear, violence, or oppression from dominant groups. The provisions of the Act are broadly categorized into three areas:
 - **Criminal law provisions:** These establish criminal liability for a range of specifically defined atrocities and expand the scope of penalties under the Bharatiya Nyaya Sanhita (which has replaced the Indian Penal Code);
 - **Relief and compensation:** Provisions for support and compensation to victims of atrocities; and
 - **Institutional mechanisms:** Provisions for establishing special authorities for the implementation and monitoring of the Act.

c. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act 2006

56. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act 2006, recognizes and vests the forest rights and occupation in forest land to Scheduled Tribes and other traditional forest dwellers who have been residing in such forests for generations but whose rights are not recorded.
57. This law provides for recognition of forest rights to Scheduled Tribes in occupation of the forest land prior to 13 December 2005 and to other traditional forest dwellers who are in occupation of the forest land and for at least 3 generations i.e. 75 years, up to a maximum of 4 hectares. These rights are heritable but not alienable or transferable.

d. Assam Land and Revenue Regulation (Amendment) Act, 1947

58. This Act of 1947 was to amend Assam Land and Revenue Regulation 1886, and insert Chapter X, which is aimed at protecting land-ownership rights of indigenous tribal people of Assam. The protective measures include constitution of compact areas, i.e. tribal belts or blocks in regions predominantly inhabited by indigenous tribal people. Land-holders in tribal belts and blocks are barred from transferring their land to any person who is a not permanent resident in that belt or block; or does not belong to a class of people notified under the relevant section of the Act. Any ineligible person, to whom land is transferred in the belts or blocks in contravention of the provision of Chapter X, will not have right or title of that land.

e. Land Acquisition, Rehabilitation, and Resettlement Act, 2013 (Special Provision for STs)

59. In addition to the Resettlement and Rehabilitation (R&R) package, Scheduled Caste (SC) and Scheduled Tribe (ST) families are entitled to the following additional benefits:
- Provision of land to each affected family in every project, including irrigation projects;
 - One-time financial assistance of ₹50,000 per family;
 - An additional 25% R&R benefits for families resettled outside the district;
 - Payment of one-third of the compensation amount at the outset;
 - Preference for relocation and resettlement within the same compact area;
 - Allocation of land for community and social purposes;
 - Preparation of a development plan in case of displacement; and
 - Continuation of reservation and other benefits applicable under Scheduled Areas (Fifth and Sixth Schedules) from the place of displacement to the resettlement location
60. Key government machinery shouldering responsibility for tribal development in the state are-
- Department of Welfare of Plain Tribes and Backward Classes (WPT&BC)
 - Office of the Development Commissioner for Hill Areas of Assam

C. ADB's Safeguard Policy Statement 2009

61. The United Nations Declaration on the Rights of Indigenous Peoples was adopted by the United Nations General Assembly in September 2007. The Asian Development Bank recognizes the rights of Indigenous Peoples to determine their own development pathways. ADB's Safeguard Policy Statement (SPS, 2009: Safeguard Requirements-3) outlines the obligations of borrowers/clients in ensuring Indigenous Peoples safeguards in ADB-supported projects. It defines the objectives, scope, and key requirements, including:
- i) Conducting social impact assessments and planning processes;
 - ii) Preparing social impact assessment reports and related planning documents;
 - iii) Ensuring information disclosure and meaningful consultations, including obtaining

- consent from affected Indigenous Peoples communities for selected project activities;
- iv) Establishing a grievance redress mechanism; and
- v) Monitoring and reporting on safeguard implementation.⁹

D. IPP Policy Framework for the Assam SWIFT Project

62. Based on the above analysis of government provisions and ADB policy, the following resettlement principles are adopted for this Project:

- i) Screen early to determine: (a) whether Indigenous Peoples are present in, or have a collective attachment to, the project area; and (b) whether project impacts on Indigenous Peoples are likely.
- ii) Undertake a culturally appropriate and gender-sensitive social impact assessment, or similar methods, to evaluate potential positive and adverse impacts on Indigenous Peoples. Consider their preferences in designing project benefits and mitigation measures. Identify culturally appropriate, gender-inclusive, and intergenerational benefits, and develop measures to avoid, minimize, or mitigate adverse impacts.
- iii) Conduct meaningful consultations with affected Indigenous Peoples communities and their organizations to ensure their participation in: (a) designing, implementing, and monitoring mitigation measures; and (b) tailoring project benefits in a culturally appropriate manner. Establish a culturally appropriate and gender-inclusive grievance redress mechanism to address concerns.
- iv) Ascertain the consent of affected Indigenous Peoples communities for: (a) commercial development of their cultural resources and knowledge; (b) physical displacement from traditional or customary lands; and (c) commercial use of natural resources within customary lands that may affect livelihoods or cultural, ceremonial, or spiritual practices. Consent refers to a collective expression of broad community support, even if some individuals or groups may object.
- v) Avoid, to the extent possible, restricted access to natural resources and physical displacement from protected areas. Where avoidance is not feasible, ensure participation of Indigenous Peoples in the design, implementation, monitoring, and evaluation of management arrangements, with equitable sharing of benefits.
- vi) Prepare an Indigenous Peoples Plan (IPP) based on the social impact assessment, with support from qualified experts and incorporating indigenous knowledge. The IPP should include: (a) a framework for continued consultation; (b) measures to ensure culturally appropriate benefits; (c) actions to avoid, minimize, mitigate, or compensate adverse impacts; (d) grievance procedures; and (e) monitoring, evaluation, budget, and time-bound implementation plans.
- vii) Disclose the draft IPP, including consultation outcomes and social impact findings, in a timely manner before project appraisal, in accessible formats and languages understandable to affected communities. The final IPP and subsequent updates should also be disclosed to all stakeholders.
- viii) Prepare an action plan for legal recognition of customary land and territorial rights when the project involves: (a) activities dependent on such legal recognition; or (b) involuntary acquisition of traditionally owned or used lands.
- ix) Monitor IPP implementation using qualified experts, adopting participatory approaches where possible. Assess whether objectives and outcomes have been achieved, considering baseline conditions, and disclose monitoring reports.

⁹Safeguard Policy Statement (June 2009) (adb.org)

V. BENEFICIAL AND MITIGATION MEASURES FOR IP

A. Introduction

63. The project is expected to have positive impacts on Indigenous Peoples (IPs). This section outlines measures to ensure that IPs receive culturally appropriate, gender-responsive social and economic benefits. Beel restoration and sustainable management are expected to create enhanced livelihood opportunities for tribal communities engaged in beel fisheries, along with new avenues for alternative livelihoods. However, due to low awareness levels and limited financial capacity, these communities may not fully realize project benefits without targeted support. Therefore, a comprehensive livelihood improvement strategy has been integrated into the project design.

64. Indigenous fishing in Assam is a long-standing tradition passed down through generations and continues to be actively practiced. It plays a crucial role in food security, culture, livelihoods, and environmental sustainability in Northeast India. In many non-protected floodplain wetlands (*beels*), community fishing is a distinctive traditional activity involving large groups of rural participants. These biodiverse ecosystems support the livelihoods and dietary needs of thousands of fishers and provide multiple ecosystem services.

Most beels in Assam are either leased by the government or managed by local communities. During the dry season, when water levels recede, fishers gather with traditional tools to trap, net, and catch fish. Community fishing is often caste-based and dominated by Scheduled Tribe (ST) groups such as Rabha, Bodo, Hajong, and Garo, along with the Kaibarta fishing community.

Beyond livelihoods, community fishing holds deep socio-cultural significance. For example, among the Rabha community, it is celebrated as a cultural festival that fosters unity, cooperation, and social cohesion. These events are often linked with local festivals and occur annually on predetermined dates, reinforcing strong community bonds.

65. Consultations with Indigenous communities highlighted the need for improved access to credit to support investments in fish seed, fishing gear, marketing, and commercialization. Youth expressed interest in engaging in fisheries-related enterprises, while women emphasized the need for financial support and training in activities such as handloom, tailoring, food processing, and preparation of value-added products (e.g., fish pickle, bamboo shoot pickle, tea processing). A range of beneficial and mitigation measures has been incorporated into the project, as outlined below.

B. Potential Beneficial Measures for Indigenous Peoples

66. The project includes the following key measures to benefit Indigenous communities:

- i) Development of rules and guidelines for community-based beel management, along with training support;
- ii) Introduction of improved fisheries stocking and conservation techniques, best practices, and digital technologies;
- iii) Support for fish seed production, breeding, and ex-situ conservation of endangered species;
- iv) Strengthening of community-based institutions such as Beel Development Committees (BDCs) and fisheries cooperatives, with enhanced financial viability and inclusion of women and marginalized groups, including IPs;
- v) Capacity building of cooperatives in organizational management, financial management, branding, marketing, and value chain development;
- vi) Public sector support for fisheries value chain infrastructure, including fish landing sites and aggregation centers;

- vii) Promotion of private sector-led fisheries commercialization through matching grants for hatcheries, feed mills, processing, and value addition;
- viii) Support for diversified income-generating activities through strengthening and revitalizing Self-Help Groups (SHGs).

C. Plan for Livelihood Improvement

67. Output 2 of the project focuses on enhancing livelihoods through initiatives linked to beel restoration and management. Key components include:

- Capacity building of BDCs and their integration into the fisheries value chain;
- Development of community-based fisheries infrastructure;
- Promotion of private sector participation and entrepreneurship;
- Support for diversified livelihood activities.

68. A comprehensive livelihood plan has been integrated into the project design, comprising multiple sub-components as outlined below:

Sub-Component 1: Training and Institutional Strengthening

69. The project will strengthen Beel Development Committees (BDCs) through training in organizational management, facilitation, business planning, and financial management. Digital payment systems will be introduced to enhance transparency and efficiency. These interventions will enable BDCs to effectively coordinate activities, engage stakeholders, manage finances, and implement sustainable beel management practices.

Sub-Component 2: Technical Advisory and Extension Support

70. To promote sustainable fisheries, the project will provide technical advisory and extension services coordinated by the Project Management Unit (PMU). Training will be delivered through cluster- and district-level Training of Trainers (ToT) using the Farmer Field School (FFS) approach. Experts from institutions such as the Central Inland Fisheries Research Institute will support training on productivity enhancement in both capture and culture fisheries. Key focus areas include:

- Quality fish seed and feed
- Improved rearing techniques
- Appropriate fishing gear and crafts

71. Extension services will also cover:

- Harvesting and aggregation practices
- Post-harvest management (transport, storage)
- Value addition (sorting, grading, drying, smoking, pickling)
- Food safety improvements and reduction of post-harvest losses

Business development support will include training, mentoring, financial access, and market linkages.

Sub-Component 3: Value Chain Study and Market Survey

72. A comprehensive value chain study will be conducted in the first year in collaboration with technical partners such as WISA, ICAR-CIFRI. The study will analyze all stages- viz. from input supply to production, processing, and marketing—to identify constraints and opportunities, and to design targeted interventions for improving productivity and sustainability.

Sub-Component 4: On-Beel Infrastructure Development

73. Infrastructure improvements will include:

- Nursery ponds and rearing pens for fingerlings production to be stocked in beel
- Fish landing sites with hygiene and sanitation facilities for proper fish harvesting
- Temporary storage (cool boxes, ice)
- Handling equipment (crates, bins)
- Provision of fishing gear and crafts based on beel size and business needs

Sub-Component 5: Off-Beel Infrastructure Development

74. Support will include upgrading auction centers with:

- Sanitation and hygiene facilities
- Cooling and storage infrastructure
- Weighing scales and transparent pricing systems
- Other potential need based and location suitable minor infrastructure

Sub-Component 6: Beel Fisheries Business Development Fund

75. A demand-driven fund will promote private sector participation and entrepreneurship, particularly among rural youth. It will support upstream and downstream activities to enhance commercialization across the beel fisheries value chain.

Sub-Component-7: Conduct training and exposure visit in branding, market development, and innovative processing and packaging along the value chain

76. To strengthen the beel fisheries value chain, specifically the downstream activities, targeted training and exposure visits will be conducted, focusing on branding, market development, and innovative processing and packaging. These initiatives are tailored for SMEs and MSMEs engaged in value addition, trade and export activities. The training will focus on the establishment of a distinctive brand for Assam Beel Fishery products, highlighting their unique qualities and regional heritage. Training will encompass brand creation, effective marketing strategies, and the adoption of modern processing and packaging technologies to enhance product appeal and durability.
77. Exposure visits will be arranged for larger processors and traders to observe best practices in the industry. Participation in trade shows and knowledge-sharing events will be encouraged to foster networking and the exchange of innovative ideas. Certification, traceability and quality assurance support will be provided to ensure that Beel Fishery products meet high standards, making them competitive in markets across India and internationally. These efforts aim to create a strong market presence for Beel Fishery products, driving the commercialization objective under the output.

Sub-Component-8: Self-Help Groups (SHGs) mapping and needs assessment

78. The Community Resource Person (CRP) of the Assam State Rural Livelihood Mission, reporting to the respective cluster-level SHG federation and working in SWIFT project villages, will lead the mapping and needs assessment of Self-Help Groups (SHGs). This assessment will cover key aspects such as the current status of SHGs, their latest grading, existing loan exposure, livelihood needs and preferences, and the skill levels of members. A detailed report will be prepared for each Block Development Cluster and submitted to the cluster-level Project Implementation Units (PIUs) under the SWIFT project for further action.

Sub-Component-9: Strengthen SHGs including revitalization of defunct SHGs

79. To strengthen SHGs, including the revitalization of defunct SHGs, targeted support and training will be provided with Community Resource Persons (CRPs) assistance. Defunct SHGs will receive orientation training on financial literacy, intra-lending practices, and bookkeeping, along with assistance in developing simple businessplans to aid their revitalization. Functioning SHGs will

continue to receive support through ongoing ASRLM activities and additional assistance in creating and implementing business plans.

Sub-Component-10: Start-up capital for performing SHGs

80. Start-up capital is provided to performing Self-Help Groups (SHGs)-categorized Grade 'A' or 'B'-through the BDCs, encouraging them to diversify their livelihood activities according to their specific business plans. This capital support is complemented by targeted skills development training in collaboration with the ASRLM, which includes enhancing financial literacy, promoting internal lending practices, and facilitating annual grading. Defunct SHGs will be eligible for start-up capital only if they improve their status to at least Grade 'B'. The application for the start-up grant would be vetted by the beel animator (at the BDC level) and approved by the BDMC before forwarding to the CPIU.

Sub-Component-11: Conduct SHG skills development and vocational training

81. The project will recruit two technical advisors at each cluster, specializing in skills such as livestock rearing and pearl farming etc. These advisors will be responsible for providing specific technical training before the SHGs start their business activities, as well as ongoing support thereafter. Additionally, the NGO service provider will offer coaching and mentoring to the SHGs once they have initiated their business activities. This support will focus on developing the specific skills required for these activities, including the intricacies of pearl farming, technical aspects of livestock rearing, such as breed management, disease management, feed management etc. Furthermore, the project will provide an honorarium to CRPs, not exceeding Rs.3000 per month, for their additional work under the SWIFT project.

Sub-Component-12: Pilot eco-tourism initiatives

82. The project will pilot a community-based eco-tourism model in selected *beels* to boost the local fisheries economy, meet domestic and export demand, and generate sustainable employment for communities. The initiative will promote awareness of fish farming and related activities, attract visitors, and create additional revenue streams for local households. Key attractions will include water-based recreation, catch-and-release fishing, fish therapy spas, sport fishing (angling), boating, natural swimming areas, traditional mud-house restaurants, and low-cost eco-lodges for accommodation.
83. Additional eco-tourism components will include eco-parks, homestays, and traditional restaurants offering local cuisine. Fiber-reinforced plastic (FRP) and artisanal boats will be introduced for tourist movement, with appropriate safety measures. The model aims to transform fishery sites into integrated tourism destinations, improving incomes, generating employment, and enhancing the competitiveness of both fisheries and tourism-related activities. These centers will also promote awareness through interpretive signage highlighting the ecological functions and ecosystem services of *beels*, emphasizing their importance for the well-being of local communities. The Environment Safeguard Specialist of PIU will fully supervise the activities in coordination with the Zonal Coordinators and DFDOs.

D. Strategy for Beneficial Measures

84. The Social and Gender Officer of PMU with support of Social Safeguard Expert of CSC will coordinate with various concerned departments at district and state level to organize training programs. Convergence with other government development scheme like ongoing schemes of fishery, tourism, tribal and forest department will be done to provide maximum benefits to the IP in strengthening the livelihood option and addressing the food security issue among the IP communities. The Pradhan Mantri Matsya Sampada Yojana (PMMSY) provide a platform to link and converge with other schemes/ sub schemes being undertaken by Ministries/Departments.¹⁰ PMU with support from CSC will also facilitate interested IPs to get credit facilities and their

¹⁰[Pradhan Mantri Matsya Sampada Yojana | Department of Fisheries, MoCIT, GoI \(dof.gov.in\)](https://pradhanmantrimatsyasampadayojana.gov.in/)

utilization. The IPP activities will also be a part of BDC's livelihood plan.

85. As part of specific development measures, capacity building of all Scheduled Tribe (ST) communities will be undertaken by the project authorities. The Social Safeguard and Gender Specialist of the CPIU will coordinate with CSCs and project animators to identify eligible and suitable candidates from ST households through need-based assessments. Indigenous Peoples (IPs), including women, will be given preference for employment opportunities during project construction. The strategy will also ensure representation and active participation of STs in Beel Development Committees (BDCs) and fisheries cooperatives. In addition, extensive awareness campaigns and capacity-building initiatives will be conducted to enable IPs to effectively participate in beel management and livelihood programs. Communication and consultations will be carried out in culturally appropriate and accessible ways, using channels that respect Indigenous traditions and practices

E. Additional Support from Ongoing Poverty Reduction Programs

86. In addition to project-sponsored programs, the CSC and animators will play a proactive role to mobilize IPs to get benefits from various government schemes for tribal development.¹¹ Pradhan Mantri Kaushal Vikas Yojana (PMKVY)¹² is a flagship program of Government of India to develop skill and capacities of youths in a particular field. The CSC and animators will work closely with the Gram Panchayat and Autonomous Councils to facilitate access for Indigenous Peoples (IPs) to the benefits of ongoing pro-poor programs aimed at poverty reduction.

F. Potential Mitigation Measures for IP Impacts

87. All indigenous households to be participated and involved under the project will be ensured to improve their living standards without exposing their communities to disintegration. As indigenous peoples, they will have traditional land rights, and these will be honored, and the absence of land titles will not be a bar for receiving any benefits. Land to be utilized for the demonstration or temporary use will be either village land or private land arranged through collective or individual consent, which will be ascertained through consultative process and signing formal MoU (**Appendix-5&6**). The IPP to be updated for the subsequent subprojects would address the issue of community participation and benefit sharing.
88. The project proposal is intended to bring positive impacts on the lives of IP communities and does not have any negative impacts. However, the potential impacts anticipated under the project and already mitigated and further suggested measures are listed in table below.

Table 12: Potential Impacts and Mitigation Measures

Sl.	Potential Impacts	Mitigation Measures
1	Involuntary acquisition of land	The project will not involve any compulsory acquisition of land. Land owned by community or individual will be utilized for demonstration purpose Through a formal agreement/MOU.
2	Physical displacement from traditional or customary lands	Loss of shelter by the owner or occupier of the land will be fully avoided.
3	Loss of Livelihood	No land will be selected for any component of the project where owner/the occupier is earning their livelihood
4	Alienation of customary land	Land will not be permanently acquired and if required only temporarily utilized with out transfer of ownership/right.
5	Impoverishment due to land utilization	No land from any small or marginal land owners will be utilized for the Project

¹¹pib.gov.in/PressReleaseIframePage.aspx?PRID=1514998

¹²PMKVY (pmkvyofficial.org)

Sl.	Potential Impacts	Mitigation Measures
6	Commercial development of natural resources and knowledge of Indigenous Peoples	The project will not promote any commercial development of natural resources and knowledge of IPs
7	Loss of land meant for cultural, ceremonial, or spiritual uses	Any land meant for cultural, ceremonial, or spiritual uses by the IP community will be fully avoided for utilization under the project.

VI. BUDGET AND FINANCING PLAN

A. Introduction

89. The Department of Fisheries (DoF) will allocate an adequate budget within the project to cover the costs of implementing the Indigenous Peoples Plan (IPP). In the absence of any loss of property or livelihood, the IPP budget will include costs related to social assessment, livelihood training, consultation and participation processes, grievance redress activities, and monitoring, evaluation, and reporting. A contingency provision of 10% will also be included to account for any variations from the estimated costs
90. The cost for beneficial measures including livelihood initiatives is included under the project cost and will also be arranged through convergence with ongoing State livelihood enhancement schemes. The cost of consultation, grievance and monitoring activities has been calculated subproject wise and the amount will be allocated to the respective CPIU.

B. Budget

91. The tentative budget for IPP implementation is prepared as presented below Rs.220,000 per sub-project (beel).

Table13: Budget Estimate for IPP Implementation

Sl.	Item	Unit (No.)	Rate(Rupees)	Amount (Rupees)
1	Organizing training/ awareness/ exposureforIPs	1	50,000	50,000
2	Consultation and Information Dissemination	1	50,000	50,000
3	Grievanc eRedressal	1	50,000	50,000
4	Monitoring and Reporting	1	50,000	50,000
	SubTotal			2,00,000
	Contingency (10%)			20,000
	GRAND TOTAL			2,20,000

C. Source of Funding and Fund Flow Management

92. The cost related to IPP implementation will be borne by the EA and is included in the training, awareness and livelihood component of the project.

VII. GRIEVANCE REDRESSAL MECHANISM

A. Introduction

93. A project level Grievance Redressal Mechanism (GRM) will be in place to redress environmental and social safeguards concerns about the project. Grievance is defined as any issues/concerns that resulted to non-performance of obligations of any of the parties involved in project processes, particularly in safeguards implementation. The GRM described below has been developed in consultation with the stakeholders and will be applicable to all subprojects implemented by DoF under the SWIFT project. The GRM is anchored on the five principles, underpinning the grievance redress processes and the arrangements envisaged to implement these:
- i) **Transparency.** The Grievance Redress Mechanism (GRM) will encourage both positive and negative feedback to improve project implementation. Communities will be informed of all complaints, grievances, and issues raised, and will be actively involved in their resolution. They will also be kept updated on the progress of grievance redress. Information on the GRM will be widely disseminated through appropriate channels to ensure that poor households, women, Indigenous Peoples (IPs), and other vulnerable and disadvantaged groups are aware of the procedures. The Project Management Unit (PMU) and Project Implementation Units (PIUs) will ensure that grievances are addressed within the stipulated timeframes, and feedback is provided to the complainants
 - ii) **Socially Inclusive.** The whole community, and even those outside, are given the opportunity to raise concerns and the right to receive a response. The GRM provides an accessible, inclusive, gender-sensitive, and culturally appropriate platform for receiving and facilitating resolution of affected persons' grievances related to the project.
 - iii) **Simple and Accessible.** Procedures for filing complaints and seeking redress will be kept simple and easy to understand, particularly for non-literate community members. Affected persons will have multiple options to submit grievances or suggestions, including verbal submissions through walk-in interactions, submission of forms in complaint/suggestion boxes placed at accessible locations, telephone hotlines, email, post, or by recording entries in complaint registers available at project sites, CSC offices, and contractor offices.
 - iv) **Anonymity and Security.** To ensure accessibility, transparency, and trust, the Grievance Redress Mechanism (GRM) will maintain the confidentiality of complainants' identities. This will encourage community members to participate openly and submit grievances without fear. The project will maintain proper documentation, including the name of the complainant, date of receipt, contact details, location of the issue, and details of the grievance. A systematic process for tracking, monitoring, and recording responses, resolution status, and closure will be established. Social Experts at the PIU, CSC, and Beel animators will share responsibility for timely grievance redressal, particularly on safeguards and gender-related issues. They will also ensure proper registration, disclosure, and communication with the aggrieved parties
 - v) **Institutional Capacity Building.** Through the GRM, the PMU will strengthen communication channels and grievance redress mechanisms at the community and project area levels.

B. Grievance Redressal Arrangements and Role Functions

94. A project-based three-tier Grievance Redress Mechanism (GRM) is proposed to ensure time-bound resolution of grievances at each level. Responsible persons, agencies, and offices will be identified to address issues and seek appropriate guidance as needed. Institutional arrangements, including the formation of Grievance Redress Committees (GRCs) at different levels, will be established and maintained throughout the project period. The Project Management Unit (PMU) will ensure the constitution of these committees and oversee the implementation of grievance redress processes, including adherence to timelines, proper record-keeping, and documentation at all levels.

Figure 5: Grievance Redressal Mechanism

95. Briefly the three-tier GRC will be as follows:

- i) **Field Level:** The first level of the Grievance Redress Mechanism (GRM) will operate at the project site. The field-level arrangement will include implementation staff such as the village head or Autonomous Council representative, members of cooperatives, SHGs or committees, representatives from Scheduled Tribe (ST) communities or existing indigenous grievance mechanisms, and NGO representatives.

Minor and urgent issues raised by complainants will be addressed at this level within 7 days. Cases that cannot be resolved at the field level will be escalated to the cluster-level PIU Grievance Redress Committee (GRC), which serves as the second tier of the GRM. A summary of grievance records will be submitted to the CPIU on a monthly basis. The PIU-level Social Safeguards Specialist will monitor the process and provide guidance and support to field staff on grievance redress and record-keeping

- ii) **Cluster PIU Level:** The second-level Grievance Redress Committee (GRC) will be established at the CPIU level and will be headed by the Zonal Officer/DFDO. The Social and Environment Coordinators of the CPIU will facilitate the grievance redress process. The committee will include representatives from local bodies or NGOs, depending on the nature of the grievance.

All grievances that cannot be resolved at the field level, as well as those directly submitted at this level, will be addressed within 15 days of receipt. The PIU will maintain proper documentation of all grievances, including those resolved at the field level. If a grievance remains unresolved within the stipulated time, it will be escalated to a higher level. The CPIU-level GRC will also ensure regular follow-up, keep complainants informed about

the status of their cases, and record their feedback, including satisfaction levels and suggestions

- iii) **PIU Level:** At the highest level, a project-level Grievance Redress Committee (GRC) will be constituted, chaired by the Director of Fisheries, who also serves as the Additional Project Director of the PIU. The committee will be supported by the Social Safeguard Specialist and Environmental Safeguard Specialist in handling grievances. Representatives from relevant line departments will be included as needed, depending on the nature of the grievance.

All grievances that remain unresolved at the CPIU level will be escalated to this committee for review, guidance, and resolution. Grievances received or referred to this level will be addressed within 15 days. Complainants will be periodically informed about the status of their cases. The Social Safeguard Specialist will be responsible for maintaining consolidated grievance records, including documentation and reporting at the project level

96. The affected person or complainant will have access to the country's legal system at any stage. Access to the legal system may run parallel to the Grievance Redress Mechanism (GRM) and is not dependent on the outcome of the GRM.

C. ADB Accountability Mechanism

97. If the established Grievance Redress Mechanism (GRM) is unable to resolve a grievance, the affected person may access the Accountability Mechanism of the Asian Development Bank by submitting a written complaint to the Complaint Receiving Officer at ADB headquarters or the ADB India Resident Mission (INRM). Before approaching the Accountability Mechanism, the affected person(s) are expected to make a good faith effort to resolve the issue by working with the concerned ADB operations department. Only if they remain dissatisfied after this process will the complaint be considered eligible for review under the Accountability Mechanism.¹³ The complaint can be submitted in any of the official languages of ADB's developing member countries. The ADB Accountability Mechanism information will be included in the project-relevant information to be distributed to the affected communities, as part of the project GRM.

D. Consultation arrangements and information dissemination

98. The GRM will adopt a consultative and participatory approach to grievance resolution, which may, in some cases, require one-to-one consultation with individual complainants or the aggrieved community. Furthermore, the PMU and the PIU Social and Gender Specialist/Environmental Specialist will be responsible for disseminating information to affected persons on the grievance redressal procedure, ensuring that the host community understands the grievance redress process, and encouraging them to register complaints. Adequate consultations, meetings, and public awareness campaigns will be conducted to achieve this objective. Information on grievances received and responses provided will be documented and reported back to the affected persons. All grievances will be treated with utmost confidentiality,

E. Record Keeping

99. The Project Management Unit (PMU), with support from the PIU Social and Gender Specialist and Environmental Specialist, will maintain comprehensive records of all grievances received. These records will include details such as the complainant's contact information, date of receipt, nature of the grievance, agreed corrective actions, date of action taken, and final outcome. A system for grievance tracking will also be maintained as part of record-keeping and reporting. Grievance reports prepared by the PIU and PMU will include both period-specific and cumulative data on key parameters such as the number of grievances received, resolved, and pending since project inception. Summarized information will be included in periodic reports submitted by the

¹³<http://www.adb.org/Accountability-Mechanism/default.asp>.

PMU, with support from the PIU, to the ADB.

100. **Periodic review and documentation of lessons learned.** The PMU will periodically review the functioning of the GRM and record information on the mechanism's effectiveness, particularly in preventing and addressing grievances within the project.
101. **Costs.** All costs involved in resolving the complaints (meetings, consultations, communication, and reporting/information dissemination) will be borne by the project.

VIII. INSTITUTIONAL ARRANGEMENT

A. Institutional Requirement

102. For implementation of IPP there will be a set of institutions involved at various levels and stages of the project. For the successful implementation of the IPP, the roles and responsibilities have been outlined in this section. The primary institutions, who will be involved in this implementation process, are the following:

B. Executing Agency

103. The Executing Agency (EA) for the project is the ARIAS Society, Government of Assam. The EA, headed by the State Project Director (SPD), will have overall responsibility for loan implementation and coordination with the Asian Development Bank and the Government of Assam. The EA has established a Project Management Unit (PMU), led by the SPD, which will function throughout the project duration. The Department of Fisheries (DoF) will serve as the Implementing Agency (IA). The state has been divided into five zones, each supported by district-level Fishery Development Offices. Project Implementation Units (PIUs) will be established at the zonal level to coordinate with District Fishery Development Officers (DFDOs), who will play a key role in implementation at the district level, with support from Beel Development Committees (BDCs)

C. Social Safeguards Roles and Responsibilities

104. The PMU will engage a Social Safeguard Specialist, who will be responsible for overall safeguards implementation and coordination across the project. The SSS will be supported by Social Safeguard and Gender Coordinators hired at CPIU level. The animators hired at the NGO level for facilitating social mobilization, consultation and capacity support at subproject level are also supposed to facilitate safeguards experts of the CPIU in implementation of the IPP. The role of different partners in implementation of IPP is given below;

a. Social Safeguard Specialist– PIU

- i) Conduct due diligence on all future subproject locations.
- ii) Assess impacts of the proposed subprojects and interventions, including their short- & long-term, as well as direct and indirect effects, on the social, cultural, and economic status of STs and other disadvantaged groups in the project area.
- iii) Ensure that meaningful consultation with Women, STs and APs is conducted at all project stages;
- iv) Support in the process of engagement and orientation of the NGO/ Expert/ Agency/ Animators on the livelihood component and formation and activation of BDCs in project locations (as applicable).
- v) Update the IPP and DDR or prepare settlement plan if necessary.
- vi) Prepare and update the GESI-AP implementation framework.
- vii) Plan and lead the implementation of the rapid assessment for the livelihood interventions and the mobilization of the BDCs.
- viii) Establish a system to monitor IP safeguards and prepare gender-, age-, and vulnerability-disaggregated indicators for monitoring important parameters of IP safeguards;
- ix) Ensure project GRM is established and functional;
- x) Address and record any grievances filed through the project GRM in a timely manner;

- xi) Ensure that all subprojects and interventions are screened in accordance with Involuntary Resettlement (IR) and Indigenous Peoples (IP) screening checklists;
- xii) Update, finalize, and disclose the draft and final Indigenous Peoples Plan (IPP) on both the project and Asian Development Bank websites;
- xiii) Ensure timely disclosure of the IPP in locations and formats accessible to Scheduled Tribes (STs) and all affected persons;
- xiv) Coordinate with contractors and designated NGO nodal personnel for social safeguards;
- xv) Conduct quarterly site visits and field monitoring;
- xvi) Prepare semi-annual social safeguards monitoring reports, submit them to the PMU for approval, and thereafter to ADB for disclosure;
- xvii) Ensure prioritization of ST households across all proposed beel locations, and conduct meaningful consultations to identify culturally appropriate livelihood activities;
- xviii) Ensure that ST communities are informed about scheduled works in the beel areas prior to project commencement;
- xix) Track progress of the Gender Equality and Social Inclusion Action Plan (GESI-AP), and coordinate with relevant PMU officials and experts to compile quarterly progress reports for ADB missions;
- xx) Coordinate with NGOs, agencies, experts, and animators for implementation of the livelihood/business plan, and ensure effective monitoring and quality assurance.

b. Social and Gender Coordinator- CPIU

- i) Assist DFDO in overall management, implementation, monitoring, and reporting of social safeguards compliance.
- ii) Conduct social impact assessment, due diligence, and meaningful consultations with the STs and their communities, affected persons, and other stakeholders, ensuring proper documentation of these activities.
- iii) Prepare and update the draft IPP based on detailed designs prepared for the project. Prepare a resettlement plan (RP) or combined indigenous peoples plan (IPP) if required. Update the draft IR-DDR and disclose it on PMU website.
- iv) Conduct census and survey, when and if required.
- v) Oversee daily implementation and monitoring of IPP, including other safeguards planning documents that may be required.
- vi) Conduct continuous public consultations and information disclosure with the support of Beel Mitra.
- vii) Prepare semi-annual social safeguards monitoring reports to be submitted to PMU, for further submission to ADB.
- viii) Address any grievances brought about through the grievance redress mechanism in a timely manner. Address and record safeguards complaints or issues through the project's grievance redress mechanism in a timely manner.
- ix) Identify any non-compliance and assist in preparing time-bound corrective action plans, if and when required.
- x) Maintain and update a subproject-wise database of grievance-related issues and report to PMU for timely actions.

- xi) Support CSC in all awareness, training, and capacity-building activities related to social safeguards, IPP and GESI-AP implementation.
- xii) Perform many social safeguards implementation-related tasks.

c. Social Safeguards Focal point– NGO/ CIFRI/WISA

- i) Assume a lead role in conducting social impact assessments, need assessments, and due diligence for proposed beel locations;
- ii) Ensure compliance with the ADB's SPS, 2009, particularly on Involuntary Resettlement (IR) and Indigenous Peoples (IP) safeguards;
- iii) Update the Indigenous Peoples Plan (IPP) and Due Diligence Report (DDR), or prepare a Resettlement Plan if required;
- iv) Ensure implementation of the IPP and DDR, avoid adverse impacts on Scheduled Tribes (STs), and conduct meaningful consultations with STs and affected persons (APs) at all stages of the project;
- v) In case of unanticipated involuntary resettlement impacts, support the Social Safeguards/Gender Officer in preparing, implementing, monitoring, and reporting on the Resettlement Plan or Corrective Action Plan;
- vi) Focus on mobilizing Beel Development Committees (BDCs), strengthening existing ones, and facilitating formation where they do not exist;
- vii) Support the PMU in updating, finalizing, and disclosing the draft and final IPP on both the project and ADB websites;
- viii) Conduct monthly site visits and field monitoring;
- ix) Coordinate with the Gender and Social Safeguards Officer and field-level entities for implementation of the GESI-AP and livelihood/business plans;
- x) Coordinate with contractors and Social Safeguards/Gender Officer of the PIU;
- xi) Record all complaints related to social safeguards and ensure their resolution through the project's Grievance Redress Mechanism (GRM);
- xii) Provide training and capacity building to BDCs and project staff on IR and IP safeguards in line with ADB SPS (2009);
- xiii) Work with CSCs and NGOs/experts/agencies/animators to ensure that BDCs are functional and actively engaged in project implementation;
- xiv) Ensure prioritization of ST households across all proposed beel locations, and conduct meaningful consultations to identify culturally appropriate livelihood activities;
- xv) Ensure that ST communities are informed about scheduled works in beel areas prior to project commencement

d. Contractor

- i) Nominate a Social Safeguards Focal Person from the contractor's team;
- ii) Support identification of unanticipated IR and IP impacts, and coordinate with the Social Safeguards/Gender Officer of the PMU and the Social Safeguards Expert of the CSC to implement appropriate mitigation measures;
- iii) Ensure compliance with the IPP and DDR during implementation, including assessment of alternatives to avoid impacts;
- iv) Address immediate and urgent construction-related issues and complaints at subproject sites;

- v) Assist in grievance redress, ensuring proper recording, reporting, and follow-up for all grievances;
- vi) Ensure that communities are informed about scheduled works in advance of project commencement;
- vii) Install information boards at sites, including GRM contact details;
- viii) Provide temporary access arrangements to beels, such as wooden planks or other suitable measures;
- ix) Promote participation of women in implementation activities and women-led enterprises.

e. Animator and BDC

- i) Ensure community and IPs participation at all stages of the project;
- ii) Support the conduct of meaningful consultations in line with the IPP;
- iii) Coordinate grievance redress processes, including registration, record-keeping, information dissemination, and timely follow-up;
- iv) Coordinate with stakeholder organizations;
- v) Assist in project monitoring; and
- vi) Provide indigenous knowledge as required.

f. Asian Development Bank

- i) Review due diligence reports & IPP, and confirm or modify project classification;
- ii) Review planning documents and disclose draft and final reports on the ADB website, as required;
- iii) Monitor project implementation through review missions;
- iv) Provide support to the Executing Agency (EA), if required, in fulfilling its responsibilities and building capacity for safeguard compliance; and
- v) Monitor overall compliance of the project with ADB's SPS.

Figure 6: Institutional Arrangement

IX. IMPLEMENTATION SCHEDULE

105. Implementation of the Indigenous Peoples Plan (IPP) will primarily involve training and support to Indigenous Peoples for undertaking livelihood and business activities. The IPP implementation schedule will be aligned with the overall project timeline and will commence after the formation of Beel Development Committees (BDCs). The IPP will be revised based on findings from the needs assessment survey. The updated IPP will be approved by the government and the Asian Development Bank and disclosed prior to implementation. Public consultations, monitoring, and grievance redress activities will be carried out throughout the project duration. However, the schedule may be adjusted depending on the progress of project activities
106. The proposed activities under the Indigenous Peoples Plan (IPP) will be implemented over a period of seven years, in line with the different phases of the project. However, the sequence of activities may change, and delays may occur due to factors beyond the project's control. Accordingly, the implementation timeline may be adjusted as necessary.

Figure 5: Implementation Schedule

X. MONITORING AND REPORTING

A. Monitoring

107. Monitoring of the Indigenous Peoples Plan (IPP) will be undertaken by the PMU and CSC. It will commence at the early stage of IPP implementation and continue until project completion. The PMU will collect information from the CSC at project sites and compile it into monthly reports to assess progress and results. Based on these findings, the work program will be adjusted as necessary to address delays or implementation issues. Monitoring will be an integral part of regular project activities, and timely reporting will be critical for enabling mid-course corrective actions.

Table 14: IPP Monitoring Indicators

Monitoring Indicators	Basis for Indicators
Demographic baseline	• Number of Scheduled Tribe (ST) persons, disaggregated by gender, age, income, status, and occupation; • Number of households with access to basic facilities such as housing, drinking water, electricity, and roads; • Number of households with members who are disabled, elderly, or otherwise vulnerable; • Number of female-headed households; • Number of births and deaths
Consultation and participation	• Number of consultations and participation activities conducted, including meetings, information dissemination events, brochures, flyers, and training sessions; • Percentage of Scheduled Tribe (ST) women participants, and number of meetings held exclusively with ST women; • Languages used during consultations and meetings; • Progress of consultation and participation activities against the approved plan and budget; • Whether consultations were conducted as scheduled, including meetings, group discussions, and community activities; • Whether separate consultations were conducted specifically with ST communities; • Whether consultations were conducted in an inclusive, gender-equitable, and culturally appropriate manner, free from external coercion or manipulation, and with proper disclosure in languages and formats accessible to the affected ST communities; • Level and adequacy of participation of ST women and children, including whether they were sufficiently represented
Beneficial measures	• Progress of implementation of beneficial measures against the approved plan; • Number of activities conducted and completed, including training, exposure visits, business/livelihood plan preparation, and other livelihood support interventions; • ☐ Percentage progress achieved against planned timelines and budget

Monitoring Indicators	Basis for Indicators
Grievance redress	• Total number of people accessing the grievance redress mechanism (GRM); • Number of grievances received; • Number of repeat grievances submitted by the same household; • Number of grievances resolved; • Average time taken for grievance resolution; • Types and frequency of grievance categories; • Status of conflict resolution and whether disputes have been effectively resolved
Budget and Timeframe	• Whether capacity building and training activities have been completed as per schedule; • Whether IPP activities are being implemented and targets are being achieved within the agreed timeframe; • Whether funds for IPP implementation are being allocated to the appropriate agencies in a timely manner; • Whether allocated funds are being utilized in accordance with the IPP
Implementation problems	• Identified delays (in terms of time and cost) due to factors such as staffing, capacity constraints, or insufficient funds; • Number of times the implementation schedule has been revised
Benefits Monitoring	• Changes in patterns of occupation, production, and resource use compared to the pre-project situation; • Changes in income and expenditure patterns compared to the pre-project baseline; • Changes in the cost of living compared to the pre-project situation, and whether incomes of affected persons have kept pace with these changes; • Changes in key social and cultural parameters related to living standards; • Specific changes observed among Scheduled Tribes (STs); • Whether the socio-economic condition of STs has improved or at least been maintained as a result of the project; • Whether ST women are receiving benefits comparable to those received by ST men?

B. Reporting

108. Internal monitoring will be undertaken by the PMU, PIU, and CPIU. The Social Safeguard and Gender Coordinators at the CPIU will prepare monthly progress reports on IPP implementation and submit them to the PIU. These coordinators will collect information from subproject sites and compile it into monthly reports to assess progress and outcomes of IPP implementation. Based on these assessments, the work program may be adjusted to address delays or implementation challenges. Monitoring will be an integral part of routine project activities, and timely reporting will be essential for undertaking mid-course corrective actions
109. With the support of CPIU, the PIU will submit semi-annual social safeguards monitoring report **(see Appendix-8 for template)** to ADB within 30 days after each monitoring and reporting period for disclosure on the ADB website. Monitoring and reporting should continue until the project completion report is issued by ADB.

Workshop on Sustainable development and management of flood plain Wetlands (beels) in Assam

Date: 19/06/2024, Venue-AAU International Guest House, Guwahati, Assam

The workshop titled “Sustainable Development and Management of Floodplain Wetlands (Beels) in Assam” was organized by the Department of Fisheries (DoF) on June 19, 2024. The workshop focused on various aspects of the Sustainable Wetland and Inland Fisheries Transformation (SWIFT) Project.

Particular emphasis was placed on the project’s technical components, with detailed discussions on Component 3: Wetlands (Beels) Conservation and Restoration. The workshop served as an important platform for collaborative review and deliberation to refine the proposed actions in the Detailed Project Report (DPR), ensuring their effectiveness in achieving the project’s objectives for sustainable wetland and inland fisheries management.

The workshop focused on three key objectives: gathering expert feedback on the draft DPR, identifying implementation challenges and opportunities, and developing innovative solutions based on best practices in wetland and fisheries conservation.

The event was attended by a diverse group of stakeholders, including representatives from Wetlands International South Asia, the Forest Department, universities and colleges, scientists and directors from Central Inland Fisheries Research Institute, the Asian Development Bank mission team, the College of Fisheries, District Fishery Development Officers (DFDOs), WorldFish Bangladesh, and Assam State Space Application Centre.

A consensus emerged among experts on the complete removal of invasive water hyacinth. However, native macrophytes will be retained at target coverage of 10–20% of the total beel area, in line with the framework of Ministry of Environment, Forest and Climate Change. This ecological balance is essential to support bird habitats, while submerged macrophytes remain vital for fish and other aquatic life. Removed water hyacinth may be utilized for composting and handicraft production.

Desilting will be targeted and primarily peripheral, guided by bathymetric surveys to identify critical areas. Inlet and outlet channels will be cleared to restore hydrological connectivity. To prevent future siltation, silt traps will be installed at inlets. Excavated silt will be reused for strengthening existing bunds or for creating earthen mounds at suitable locations, which can also serve as bird habitats.

These measures reflect a balanced approach that integrates ecological considerations with engineering interventions. The workshop represents a significant step forward for the SWIFT project, enabling the Department of Fisheries to refine strategies through expert inputs and move toward sustainable management of Assam’s wetlands and fisheries.

Appendix 1: List of Priority Subprojects Under SWIFT Project

Sl no	CPIU	Name of Beel	District	Total area
1	CPIU-1	Pitkati Beel	Kamrup (R)	12.62

Appendix 2: Indigenous Peoples Impact Screening Checklist

Indigenous Peoples Impact Screening Checklist

KEY CONCERNS (Please provide elaborations on the Remarks column)	YES	NO	NOT KNOWN	Remarks
A. Indigenous Peoples Identification				
1. Are there socio-cultural groups present in or use the project area who may be considered as "tribes" (hill tribes, schedules tribes, tribal peoples), "minorities" (ethnic or national minorities), or "indigenous communities" in the project area?	X			The composition of STs in the total population of Assam is 12.45%. ST people are found traditionally involved in beel fishing. One project district-Kokrajhar has been declared as the Scheduled Area.
2. Are there national or local laws or policies as well as anthropological researches/studies that consider these groups present in or using the project area as belonging to "ethnic minorities", scheduled tribes, tribal peoples, national minorities, or cultural communities?	X			The Constitution of India Article 342 identifies 24 ethnic groups as Schedule Tribe in Assam state.
3. Do such groups self-identify as being part of a distinct social and cultural group?	X			They identify themselves as <i>Adivasi</i> (Tribe).
4. Do such groups maintain collective attachments to distinct habitats or ancestral territories and/or to the natural resources in these habitats and territories?	X			They do have a collective attachment to their traditional customs and habitat particularly in Autonomous districts.
5. Do such groups maintain cultural, economic, social, and political institutions distinct from the dominant society and culture?	X			Each ST groups maintain different cultural, and social norms
6. Do such groups speak a distinct language or dialect?	X			Each ST group has distinct language. However, Assamese is spoken all over the state.
7. Has such groups been historically, socially, and economically marginalized, disempowered, excluded, and/or discriminated against?		X		Not Applicable

KEY CONCERNS (Please provide elaborations on the Remarks column)	YES	NO	NOT KNOWN	Remarks
8. Are such groups represented as "Indigenous Peoples" or as "ethnic minorities" or "scheduled tribes" or "tribal populations" in any formal decision-making bodies at the national or local levels?	X			STs have representation in 6 autonomous councils and 33 development councils in the state.
B. Identification of Potential Impacts				
9. Will the project directly or indirectly benefit or target Indigenous Peoples?	X			The project will positively benefit them by safeguarding their fishing rights and promoting livelihood opportunities in a sustainable manner.
10. Will the project directly or indirectly affect Indigenous Peoples' traditional socio-cultural and belief practices? (e.g. child-rearing, health, education, arts, and governance)		X		Not Applicable
11. Will the project affect the livelihood systems of Indigenous Peoples? (e.g., food production system, natural resource management, crafts and trade, employment status)	X			The project will positively impact the livelihood system of STs by creating new opportunities in the fishing sectors.
12. Will the project be in an area (land or territory) occupied, owned, or used by Indigenous Peoples, and/or claimed as ancestral domain?		X		Not Applicable
C. Identification of Special Requirements <i>Will the project activities include:</i>				
13. Commercial development of the cultural resources and knowledge of Indigenous Peoples?		X		Not Applicable
14. Physical displacement from traditional or customary lands?		X		Not Applicable
15. Commercial development of natural resources (such as minerals, hydrocarbons, forests, water, hunting or fishing grounds) within customary lands under use that would impact the livelihoods or the cultural, ceremonial, spiritual uses that define the identity and community of Indigenous Peoples?		X		Not Applicable

KEY CONCERNS (Please provide elaborations on the Remarks column)	YES	NO	NOT KNOWN	Remarks
16. Establishing legal recognition of rights to lands and territories that are traditionally owned or customarily used, occupied, or claimed by Indigenous Peoples?		X		Not Applicable
17. Acquisition of lands that are traditionally owned or customarily used, occupied, or claimed by Indigenous Peoples?		X		Not Applicable

A. Anticipated project impacts on Indigenous Peoples

Project component/ activity/ output	Anticipated positive effect	Anticipated negative effect
Output 1: : Institutional capacity and regulatory framework for sustainable ecosystem and fisheries management strengthened.	This output aims to improve the current government system of <i>beel</i> management. It introduces a range of integrated measures in priority sub-project locations. These measures include (i) updating relevant <i>beel</i> management and fishery acts, regulations, and rules; (ii) preparing rules or guidelines for community-based <i>beel</i> management system, considering various hydrology of wetlands, channels, agroecological situations, and providing necessary training on the subject;; (iii) preparing a sustainable operational model as a project exit plan; (iv) capacity building and training of the Department of Fisheries (DoF) staff and other allied public institutions; (v) supporting research and development in <i>beel</i> management and fisheries; (vi) strengthening <i>beel</i> community-based institutions (vii) develop and operate <i>beel</i> management monitoring system. The proposed measures will directly benefit the STs by improved <i>beel</i> ecosystem, production and making <i>beel</i> a sustainable source of livelihood.	None
Output 2: Community-based fisheries business developed and <i>beel</i> community income diversified.	This output is mainly to support economic activities in <i>beel</i> community-based institutions. It will finance: (i) development or strengthening of fisheries cooperatives; (ii) conduct capacity building for these cooperatives, branding, marketing and processing along the value chain (iii) provide public sector support for the development of community-based fisheries value chain infrastructure, including fish landing sites and local aggregation points/centers;(iv) matching grant facilities for hatchery, feed mill, primary processing and other value addition initiatives; (v) support need based other income generation activities for self-help groups.	None
Output 3: <i>Beel</i> conservation and restoration planned and managed.	This output will support restoration approaches focusing on: (i) <i>beel</i> demarcation; (ii) <i>beel</i> rejuvenation, such as de-weeding and desilting; and (iii) <i>beel</i> 's water inflow and outflow control improvement, including desilting, constructing embankments, installing silt traps, building water retaining structures and peripheral bunds, and installing biofilters.	None

BODOLAND TERRITORIAL COUNCIL,
DEPARTMENT OF FISHERY,
BODOLAND SECRETARIAT COMPLEX, BODOFA NWGWR
KOKRAJHAR 783370

No .BTC/Fish-25/2023-24/52

Dated Kokrajhar, the 7th Jan./2026

From : Sri Wilburn Daimary, ACS,
 Secretary,
 Bodoland Territorial Council,
 Kokrajhar.

✓ To, The Joint Director cum- CHD,
 Fishery Department,
 BTC, Kokrajhar.

Sub : Approval for No Objection Certificate.

Ref. : Letter No. JDF/BTC-62/2024-25/529, dtd. 17-11-2025

Sir,

With reference to the subject cited above, and letter under reference I am directed to inform you that the Bodoland Territorial Council, Kokrajhar has No Objection for development of Beel Fisheries of Asian Dev. Bank Sustainable Wetland and Integrated Fisheries Transformation (ADB-SWIFT) under Dotma and Gossaigaon Revenue Circle.

This is for favour of your kind information and necessary action.

Yours faithfully

 Secretary, Fishery Department,
 Bodoland Territorial Council,
 Kokrajhar

Memo. No .BTC/Fish-25/2023-24/52

Dated Kokrajhar, the 7th Jan./2026**Copy to:**

1. The SSO to the Hon'ble Chief, BTC, Kokrajhar for kind appraisal to the Hon'ble Chief, BTC.
2. The SSO/PA to the Hon'ble Executive Member Fishery Deptt., BTC, Kokrajhar for favour of kind appraisal.
3. The PS/PA to the Principal Secretary, BTC, Kokrajhar for favour of kind appraisal.
4. The Office copy.

/
 Secretary, Fishery Department,
 Bodoland Territorial Council,
 Kokrajhar

Sample Social Safeguard Screening Checklist

Sustainable Wetland and Integrated Fisheries Transformation (SWIFT) Project

Place: Judgaon Name of Beel: Becharani Beel Date: 6.08.2024
Mongaon district

1. Management of beel. A management committee called 'Jathya Monga Aikantik Jajati Beel Development and Conservation Committee' having 33 members President - Manabhar Jaisri. Earlier, the beel was given a lease for 5 lakh Rs. per annum but now the committee is doing fishing and marketing of its own. The benefit is shared among all 150 HH of Judgaon.
2. Use of beel. Beel is primarily used for fishing for individual and commercial purpose. Migratory birds ^(Ducks) are used to come in winter.
3. Main problems related to fisheries. The approach road to beel is damaged. Lotus, lily and water hyacinth are major problems. De-weeding is must in order to improve fish productivity. Community is found willing to participate in the project since.
4. Willingness to participate in the program. There are no other govt schemes which can help them financially and technologically in De-weeding.
5. Community conflict related to use and management of beel. No major conflict was reported. The village has its traditional system of grievance redressal. Any major case is resolved by autonomous council.
6. Encroachment ----- type and nature. The beel is free from all encroachment. No encroachment.
7. Involvement of ST people in fisheries. name/ no. of HH. In Judgaon there are 150 HHs. All are from Tiwa ST Community. This village comes under Tiwa Autonomous Council. Mr. Khagenich Bordoloi is the Executive Member.
8. Community's suggestion. The village has 26 women SHGs and some of them have taken loan from bank for farming, livestock, poultry, fishery etc. According to them they need training and equipments for weaving (have traditional skill) and marketing of fish by-products.

মাননীয় জিলা মীন বিষয়া মহোদয়ৰ সমীপে,
তিনিচুকীয়া মীন বিভাগ, অসম।

বিষয় : বিল উন্নয়নৰ সন্দৰ্ভত আবেদন পত্ৰ।

মহোদয়,

সন্মান সহকাৰে সন্মানীয় জিলা মীন বিষয়া মহোদয়ক আমি শদিয়া মহকুমা
লগতে তেলিকলা-মাজগাঁও অঞ্চলবাসীয়ে বিশেষকৈ “তেলিকলা মাজগাঁও ফিচফাৰ্ম”
তৰফৰ পৰা এটি বিশেষ অনুৰোধ জনাব বিচাৰো যে, বৰ্তমান সময়ছোৱাত ড॰
হিমন্ত বিশ্ব শৰ্মা ডাঙৰীয়াৰ নেতৃত্বাধীন বি.জে.পি চৰকাৰখনে বৰ্তমান অসমৰ পৰিভুক্ত
অৱস্থাত থকা বিলসমূহৰ উন্নয়নৰ এক বৃহৎ আঁচনি ৰূপায়ন কৰিছে আৰু আমাৰ
শদিয়া সম জিলাৰ অন্তৰ্গত আমাৰ অঞ্চলৰ “পেৰাবিল” নামৰ এখন বৃহৎ বিল
পৰিভুক্ত অৱস্থাত আছে। আমি সকলোৰে বিচাৰো বিলখনৰ সৰ্বাঙ্গীন উন্নয়ন হওক।

গতিকে মহোদয়ে আমাৰ বিলখনত দৃষ্টি নিষ্ক্ষেপ কৰি আগন্তুক দিনত বিলখনত
উন্নয়নৰ আঁচনি সমূহ ৰূপায়ন কৰে যেন।

এইয়ে অঞ্চলবাসীৰ লগতে আমাৰ তেলিকলা মাজগাঁও ফিচফাৰ্মৰ তৰফৰ পৰা
বিনম্ৰ অনুৰোধ জনালোঁ।

ধন্যবাদেৰে..

Appendix 3: Template MoU for Community or Private Land

This Memorandum of Understanding (MoU) is signed on, between the landowner/occupier of the land/plot No. located at represented by Shri/Smt.....(Village head, Member autonomous council)(Hereafter referred to as '*First Party*'), and the Beel Development Committee (BDC) of Village represented by Shri/Smt(Chairman/Secretary) (hereafter referred to as the '*Second Party*') and representative of DoF Shri/Smt (District Fishery Development Officer) of District (Hereafter referred to as the '*Third Party*').

1. Objective of the MoU

The objective of this MoU is to obtain consent from the First Party for utilization of aforesaid land/plot with an area of hectares by all the parties signing the agreement for the implementation of the SWIFT Project supported by the Government of Assam and Asian Development Bank (ADB), hereafter referred to as '*the Project*' by all Parties signing this agreement.

2. Role and Responsibilities of the First Party

- i. The First Party will ensure that all households /clan members concerned are fully informed about and have willfully given their consent / no objection for utilization of the above-mentioned land/plot to implement the Project in the village supported by the Government of Assam and Asian Development Bank (ADB) for the benefit of the village community.
- ii. The First Party shall cooperate and thereby implement all prescribed initiatives in the cited plot of land to achieve the objectives for which it is intended.
- iii. The First Party shall continue to exercise their existing right over the beel. However, the right over the assets/infrastructures created under the project on the said land during and beyond the project period shall be vested in the Second Party.
- iv. The First Party and village community shall jointly share the benefits arising out of the beel restoration and livelihood opportunities.

3. Role and Responsibilities of the Second Party

- i. The Second Party together with the First Party shall ensure implementation of the village livelihood plan in line with SWIFT project and Assam Fishery Rules, 1953, (amended in 2005).
- ii. The second party shall ensure sharing of benefits with the First Party in case the Project initiative results into generation of livelihood opportunities and its associated revenue in future.
- iii. The Second Party will ensure that the community utilizes the beel and land resource for the purpose for which it is intended.
- iv. The Second Party shall fully inform and take consent from the First Party in cases where it plans to implement project initiatives other than the purpose for which it is intended.
- v. The Second Party will ensure that no clear felling of trees will take place in the said

catchment area except harvesting matured trees for their own use and no habitation, setting up of sand/stone quarry, jhum cultivation and other activities are carried out that affect water discharge and result in to efficient discharge of water.

- vi. The Second Party shall take initiative to seek additional necessary resources for implementing soil and water conservation measures for rejuvenating the beel resource.
- vii. The Second Party shall take initiative to mobilize necessary resources for maintenance of the assets generated in the plot of land allotted to the BDC by the First Party.

4. Role and Responsibilities of the Third Party

- i. The Third party shall provide all technical assistance required for implementation of the Project.
- ii. The Third Party shall ensure that ADB's social and environment safeguards are followed in all activities taken up under the Project.
- iii. The Third Party shall initiate and conduct of joint inspection with the First Party and the Second Party to ensure quality of work.
- iv. The Third Party shall assess and approve the livelihood activities in the village area proposed by the First Party and the Second Party.

5. Conflict Resolution

Any dispute, controversy, differences or claim arising out of or relating to this MoU including the existence, validity, interpretation, performance, breach or termination thereof or any dispute regarding non-contractual obligation arising out of or relating to it shall be first resolved through mutual understanding failing which, the matter will be referred to the Deputy Commissioner for dispute resolution.

6. Extent of the MOU

At the end of the project, the status of the infrastructure and the intentions of all parties will be assessed and the following applied:

- a. Where no changes are required, the current MOU will carry on upholding the agreement based on a seven year reassessment program
- b. Where changes are negotiated, but continuation of project interventions agreed, new MOUs will be signed.
- c. For sites that are no longer planned to be used for the same purpose, the second and third party will be responsible to rehabilitate the areas wherein structures were built.

Signature and Seal of the First Party

Represented by

.....
Land owner/panchayat representative/ EM of autonomous council

TWO WITNESSES: (NB: *It is recommended that land owner/panchayat representative/member of autonomous council sign with seal as one of the witnesses in cases where they have not signed above, wherever required*)

**Name & Signature with date & Official Seal of the Third Party
(as may be authorized by the O/o the DoF)**

It is verified that,

1. The land required for the project is given voluntarily and the land to be provided is free from any dispute on ownership or any other encumbrances.
2. The process of formal consent for land utilization was transparent and carried out without coercion.
3. The affected parties will not be impoverished by the land utilization (i.e., no more than 5% of total agricultural land holding provided), and
4. The land utilization will not displace any parties including tenants or labor, if any, on the land.

Name & Signature with date & Official Seal of the Verification Authority

Appendix 4: Template for NOC

Date: _____

This no objection certificate is hereby issued regarding the implementation of the following community infrastructure intervention which have been proposed in the Village _____ under Block _____ in the District of _____.

“Sustainable Wetland and Integrated Fisheries Transformation Project”

The village inhabitants have requested that these infrastructure interventions will be realized by the **Project** since no other support is available for this.

I herewith also certify that the proposed community infrastructure will be realized on ***agreed community land/ agreed private land***, which is not subject to any dispute.

I also confirm that:

1. The village communities understood the project and subproject/interventions during the consultation meetings;
 2. During the consultation meetings, the village communities have expressed their opinion and needs without coercion from internal and external participants;
 3. A Beel Development Committee has been formed for the subproject;
 4. The village communities will provide all required support during project implementation;
 5. The community members are committed to take charge of operation and maintenance of all community infrastructures after this have been completed and handed over to the community.
- I welcome realization of the proposed interventions as early as possible.

Name, Signature and Seal of Village/Panchayat Head / Member Autonomous Council

Memorandum of Understanding

Land Donation for Access Road to Beel

Sustainable Wetland and Integrated Fisheries Transformation Project

This memorandum of understanding is made on _____ day of _____ between Sri _____ son of _____ resident of _____ (hereinafter referred to as "the first party") and the Department of Fishery, Govt. of Assam State through Sri _____ (designation) _____ (hereinafter referred to as "second party").

THESE PRESENTS WITNESS AS FOLLOWS:

1. That the first party is landowner with transferable right _____ acre of land bearing khasra No. _____ in village _____ Block _____ , tehsil _____ , district _____ .
2. That the first party hereby grants to the second party above said land for the construction and development of access road to beel in the village _____ for the benefit of the villagers and the public at large.
3. That the first party would not claim any compensation against the above said grant of land.
4. That the second party agrees to accept the above grant of land for the purposes mentioned in clause 2.
5. That the second party shall construct and develop the access road and take all possible precautions to avoid damage to land adjacent to the road.
6. That the first party also assures the second party that the first party will not indulge in any willful act of damaging it or obstructing the movement of public and vehicles on the access road to beel.
7. That both the parties hereto agree that the access road so constructed/developed shall be public premises.
8. That the provisions of the MEMORANDUM OF UNDERSTANDING will come into force from the date of signing of this deed.

IN WITNESS WHEREOF the parties hereto have signed this deed on the day and the year first above written.

Signature of the first party

Sustainable Wetland and Integrated Fisheries Transformation Project

Affidavit for land donation

I, _____ wife / son / daughter of Sh. _____, resident of _____ do hereby solemnly affirm and declare as under:-

1. I am the landowner with transferable right of _____ acre of land bearing khasra No. _____ in village _____ block _____, tehsil _____, and district _____.

2. That under the **Sustainable Wetland and Integrated Fisheries Transformation Project** an access road to beel is to be constructed, which will be of benefit to all residents of the area. Accordingly, I hereby agree to donate a portion of land, _____ m long for a width of _____ m (as delineated in the sketch appended to this affidavit by the letters ABCDEF) absolutely and forever.

3. I hereby grant the above said portion of the land for the construction and development of **Access Road to Beel** in the village _____ for the benefit of the villagers and the public at large to Government of _____ (State).

I/my successors would not claim any compensation against the above said portion of land.

4. I hereto agree that the Access Road so constructed/developed shall be public premises.

5. I hereby commit that this affidavit shall be valid strictly only to the extent of land specified in the affidavit and shall not spillover into the residual holding. In the event of any violation of the same or any damages to structure/assets outside the said portion during the project implementation, the liability towards payment for damages shall be of the DoF, Government of _____ (State).

Appendix 8: Social Safeguard Monitoring Report Template

The following headings provide guidance on the main elements the social monitoring report should contain:

Executive Summary - brief overview of the status of the project and monitoring activities.

1.0 Introduction

- 1.1 Scope of the Report
- 1.2 Brief Project Description

2.0 Project Status

- 2.1 Status of Project Implementation
- 2.2 Status of Project Monitoring Activities
- 2.3 Implementation Schedule

3.0 Performance Monitoring

Provide a brief summary on performance monitoring in accordance to SPS 2009 requirements

3.1 Compliance with Legal and Policy Requirements

Provide a brief summary on the status of the project's compliance with host country laws on social safeguard requirements.

3.2 Compliance with Social Safeguard Covenants

In brief, identify the loan covenants relating to social safeguards and describe (preferably in table format) - the process and status for complying with each.

3.3 Compliance with Safeguard Plan Requirements

Generally, identify compliance with the process of consulting DPs, payment of entitlements (compensation and assistances), and getting their participation in livelihood restoration programs, as defined in the IPP; identify any major variations or changes to the process/requirements; identify and describe any updates to the IPP and process to address these.

To demonstrate real value added, it will be important to highlight and discuss the nature and scope of the livelihood restoration programs - including how many people are benefitting, define those that are eligible (under what criteria), describe what kind of livelihood programs are offered, and involved in and what is the intended or real consequence of this - how will it help people improve their quality of life.

4.0 Implementation of the Grievance Redress Mechanism

- 4.1 Grievance Redressal Mechanism - briefly define/explain the process.
- 4.2 Status of Implementation of the GRM

Briefly describe how the GRM is being implemented. In table format, please list all complaints received, the nature of the complaint, the status of resolution and the resolution itself. Where grievances have not been closed, please identify what is being done to try to reach a resolution.

5.0 Stakeholder Engagement

5.1 Stakeholder Engagement Process

Briefly define and explain the process followed to maintain on-going dialogue with stakeholders/DPs.

5.2 Consultations

Provide an updated list of consultations carried out during the period. Identify the nature of the issues raised and how these have been resolved.

6.0 Conclusion

Provide a brief conclusion summarizing the general findings on the process of performance monitoring. Provide recommendations for continued action, improvements, or refinements in the process.
